The Development of Oral and Written Language in Social Contexts Anthony D. Pellegrini,Thomas D. Yawkey,1984 **The Tyranny of Writing** Constanze Weth,Kasper Juffermans,2018-01-25 This book examines the powerful role of writing in society The invention of writing independently at various places and times in history always stood at the cradle of powerful civilizations It is impossible to imagine modern life without writing As individuals and social groups we hold high expectations of its potential for societal and personal development Globally huge resources have been and are being invested in promoting literacy worldwide So what could possibly be tyrannical about writing The title is inspired by Ferdinand de Saussure s argument against writing as an object of linguistic research and what he called la tyrannie de la lettre His critique denounced writing as an imperfect distorted image of speech that obscures our view of language and its structure The chapters of the book written by experts in language and literacy studies go beyond this and explore tyrannical aspects of writing in society through history and around the world from Medieval Novgorod the European Renaissance and 19th century France and Germany over colonial Sudan to postcolonial Sri Lanka and Senegal and present day Hong Kong and Central China to the Netherlands and Spain The metaphor of tyranny of writing serves as a heuristic for exploring ideologies of language and literacy in culture and society and tensions and contradictions between the written and the spoken word

A Bibliography on Writing and Written Language Jacek Fisiak, Konrad Ehlich, Florian Coulmas, Gabriele Graefen, 1995

Social Problems and Social Policy James Ford, 1923

Clinical and Abnormal Psychology John Edward Wallace Wallin, 1927

This book is based on a course of lectures delivered since 1912 in over a half dozen universities and schools of education. It is the outgrowth of more than seventeen years of labor in several states devoted to mentally, educationally, and socially abnormal children. This work has included the individual examination of seven thousand cases, the organization and administration of systems of developmental and reconstructive training, and the perusal of the avalanche of books and articles which have appeared during this period in the highly productive field of psychological and educational tests and mental hygiene and in cognate fields. The book aims to give a fairly adequate picture of the inner mechanism of the psychological and psychoeducational clinic and to touch incidentally upon various topics in abnormal psychology with which the clinical psychologist, mental and educational tester, special class teacher, visiting teacher, social worker, medical student preparing for work in mental hygiene, and others interested in abnormal behavior problems should be familiar. A comprehensive survey in spite of necessary brevity will furnish orientation and perspective, show the relationship between topics, and supply the essential groundwork for further study. This book will serve its purpose if it succeeds in opening up the field for the general reader and in supplying a broad foundation of facts, procedures, and principles on which the technical worker may build.
