or can't seem to settle down at night it's because he is by nature a poor sleeper. However, this is rarely the case. Virtually all children without major medical or neurological disorders are able to sleep well. It may be tempting to assume that your child is one of the few children who have difficulty sleeping, but that is almost never the case. Most children have a normal ability to fall asleep and remain asleep, even if they have a sleep disturbance such as sleepwalking or bedwetting. *Keys to Children's Sleep Problems* Susan E. Regrettably, the answer is typically Very little. As a matter of fact, research studies reveal that approximately 25% of little ones experience some type of sleep issue, and also, as any kind of bleary-eyed parent will attest, it is one of the most tough obstacles of parenting. *Solving Sleep Problems in Children with Autism Spectrum Disorders* Terry Katz, Beth Ann Malow, 2014 The authors show parents how to evaluate sleep problems in children with autism spectrum disorder. They describe the basics of sleep, the connection between sleep and autism, how to evaluate daily routines and sleep habits, types of sleep problems children might have, and what to do, medical considerations, and partnering with a health care provider, how to help children transition to bedtime, fall asleep, and stay asleep, and how to evaluate the sleep plan and apply it to new situations like sleepovers and vacations.
