Space Image Processing:

Space Image Processing Julio Sanchez, 2018-12-19 *Space Image Processing* covers the design and coding of PC software for processing and manipulating imagery obtained by satellites and other spacecraft. Although the contents relate to several scientific and technological fields, it serves as a programming book providing readers with essential technical information for developing PC applications. The material focuses on images of the planet and other celestial bodies obtained by orbiting and non-orbiting spacecraft. This book is not about raster graphics in general but about raster graphics processing as it applies to space imagery. Three parts divide the text: 1. Science background at an introductory level, scientific principles underlying space imagery and its processing topics related to space and remote sensing; 2. Technology topics related to space imagery, geodesy, cartography, image data formats, image processing; 3. Programming code examples for DOS and Windows programming on the PC, consideration of low-level and C code routines with a tutorial and demonstrative purpose.

Computer Vision and Image Processing Jagadeesh Kakarla, R. Balasubramanian, Subrahmanyam Murala, Santosh Kumar Vipparthi, Deep Gupta, 2025-07-19 The Six volume proceedings set LNCS 2473 and 2478 constitutes the refereed proceedings of the 9th International Conference on Computer Vision and Image Processing CVIP 2024 held in Chennai, India during December 19-21, 2024. The 178 full papers presented were carefully reviewed and selected from 647 submissions. The papers focus on various important and emerging topics in image processing, computer vision applications, deep learning, and machine learning techniques in the domain.

Digital Image Processing Wilhelm Burger, Mark J. Burge, 2012-01-19 Written as an introduction for undergraduate students, this textbook covers the most important methods in digital image processing. Formal and mathematical aspects are discussed at a fundamental level, and various practical examples and exercises supplement the text. The book uses the image processing environment ImageJ, freely distributed by the National Institute of Health. A comprehensive website supports the book and contains full source code for all examples in the book, a question and answer forum, slides for instructors, etc. *Digital Image Processing in Java* is the definitive textbook for computer science students studying image processing and digital processing.

Lean Manufacturing and Six Sigma Fausto Pedro García Márquez, Isaac Segovia, Tamás Bányai, Péter Tamás, 2020-02-14 Lean Manufacturing, also called lean production, was originally created in Toyota after the Second World War in the reconstruction period. It is based on the idea of eliminating any waste in the industry, i.e., any activity or task that does not add value and requires resources. It is considered in every level of the industry, e.g., design, manufacturing, distribution, and customer service. The main wastes are overproduction, waiting time of operators and machines, unnecessary transportation, waste in the process itself, excess stock of material and components, non-value-adding motion, defects in quality. The diversity of these issues will be covered from algorithms, mathematical models, and software engineering by design methodologies and technical or practical solutions. This book intends to provide the reader with a comprehensive overview of the current state, cases, studies, hardware, and software.
