XML Fast Start Smart Brain Training Solutions, 2014-05-27 What is XML XML or eXtensible Markup Language is a metalanguage That is it's a language that can be used to describe other languages and a specification for storing information Although XML and HTML may seem to have a lot in common in reality the difference between them is like the difference between night and day HTML is used to format information but it isn't very useful when it comes to describing information For example you can use HTML to format a table but you can't use HTML to describe the data elements within the table The reason for this is that you can't really depict something as abstract as a distributor or a customer with HTML which is where XML comes into the picture XML can be and is used to define the structure of data rather than its format This Fast Start guide begins by showing you the basics of the XML language and then builds on that knowledge to show you how to create an XML document

Dictionary of XML Technologies and the Semantic Web Vladimir Geroimenko, 2012-12-06 The emerging Second Generation Web is based entirely on XML and related technologies It is intended to result in the creation of the Semantic Web on which computers will be able to deal with the meaning semantics of Web data and hence to process them in a more effective and autonomous way This new version of the Web introduces a multitude of novel concepts terms and acronyms Purpose Scope and Methods This dictionary is an effort to specify the terminological basis of emerging XML and Semantic Web technologies The ultimate goal of this dictionary is even broader than just to define the meaning of new words it aims to develop a proper understanding of these leading edge technologies To achieve this comprehensible definitions of technical terms are supported by numerous diagrams and code snippets clearly annotated and explained The main areas covered in this dictionary are 1 XML syntax and core technologies such as Namespaces Infoset and XML Schema 2 all the major members of the XML family of technologies such as XSLT XPath and XLink 3 numerous XML based domain specific languages such as NewsML News Markup Language 4 the concept and architecture of the Semantic Web 5 key Semantic Web technologies such as RDF Resource Description Framework RDF Schema and OWL Web Ontology Language and 6 Web services including WSDL Web Services Description Language and SOAP Simple Object Access Protocol
