## **Texts And Testaments:**

**The Text of New Testament** B.M. Metzger, B.D. Ehrman, 1968      The Early Text of the New Testament Charles E. Hill, Michael J. Kruger, 2012-06-14 The Early Text of the New Testament aims to examine and assess from our earliest extant sources the most primitive state of the New Testament text now known What sort of changes did scribes make to the text What is the quality of the text now at our disposal What can we learn about the nature of textual transmission in the earliest centuries In addition to exploring the textual and scribal culture of early Christianity this volume explores the textual evidence for all the sections of the New Testament It also examines the evidence from the earliest translations of New Testament writings and the citations or allusions to New Testament texts in other early Christian writers      *Studies on the Text of the New Testament and Early Christianity* Daniel Gurtner, Juan Hernández, Jr., Paul Foster, 2015-09-29 The collection of essays focuses on the twin areas of research undertaken by Prof Michael W Holmes These are the sub disciplines of textual criticism and the study of the Apostolic Fathers The first part of the volume on textual criticism focuses on issues of method the praxis of editing and collating texts and discussions pertaining to individual variants The second part of the volume assembles essays on the Apostolic Fathers There is a particular focus on the person and writings of Polycarp since this is the area of research where Prof Holmes has worked most intensively      *Textual Scholarship and the Making of the New Testament* David C. Parker, 2012-10-04 The book is going through its biggest revolution since Gutenberg Thanks to computer tools and electronic publication the concept and realisation of critical editions are being rethought As so often in the history of scholarship editors of the New Testament are making a vital contribution to these changes In this book originally the Lyell Lectures in Bibliography at Oxford David C Parker explores textual scholarship in particular the idea of the edition He argues that textual scholarship has had an important influence on the meaning given to the term New Testament Starting with the observation that a text is a process not an object he proposes a new way of understanding the relationship between manuscripts the texts which manuscripts contain and the work they represent as the basis for critical scholarship This leads him to challenge the idea of a Greek New Testament manuscript and thus to reconsider the nature of the New Testament as a collection of works and the nature and purpose of critical editions By studying new tools for studying how manuscripts are related to each other he shows how the modern digital edition of the New Testament has overcome the impasses created by the failure of Lachmannian stemmatics to deal with the problem of contamination Exploring the emergence of the critical edition in modern scholarship Parker discusses the ways in which a digital edition advances scholarship and gives the reader more opportunities both to scrutinise the quality of the edition and to access the raw data on which it is based The whole book uses New Testament research as a paradigm of wider changes in textual scholarship      *Essays Chiefly on the Original Texts of the Old and New Testaments* Thomas Kingsmill Abbott, 1891      **The New Oxford Annotated Bible with the Apocryphal/Deuterocanonical Books** Marc Zvi Brettler, Carol Ann Newsom, Pheme Perkins, 2007 Presents the complete

text of the New Revised Standard Version Bible with the Apocryphal Deuterocanonical books and features annotations in a single column across the page bottom in text background essays on the major divisions of the biblical text and other reference tools

Texts and Artefacts Larry W. Hurtado, 2017-11-30 The essays included in this volume present Larry W Hurtado's steadfast analysis of the earliest Christian manuscripts In these chapters Hurtado considers not only standard text critical issues which seek to uncover an earliest possible version of a text but also the manuscripts available to us themselves Hurtado examines often overlooked 2nd and 3rd century artefacts which are among the earliest manuscripts available drawing fascinating conclusions about the features of early Christianity The volume is divided into two parts The first addresses text critical and text historical issues about the textual transmission of the New Testament writings The second part looks at manuscripts as physical and visual artefacts themselves Whilst these essays are presented together as a republished collection Hurtado has made several updates across the collection to draw them together and to reflect on the developing nature of the issues they address since they were first written

Back cover **The Great Texts of the Bible: Isaiah** James Hastings, 1910 *Two Testaments, One Bible* David L. Baker, 1992 Examining the problem of the unity of Old and New Testaments from the perspective of the texts themselves David L Baker analyzes four modern solutions discusses some key themes and then offers his own solutions

*The Text of the New Testament* J. Harold Greenlee, 2008-06-01 The Text of the New Testament is a brief introduction for the lay person into the process whereby the New Testament came to be It describes the basics of ancient writing tools manuscripts the work of scribes and how to think about differences in what the various manuscripts say This is a revised and expanded edition with a completely new chapter on how contemporary English translations fit in with our understanding of the New Testament text Geared to the lay person who is uninformed or confused about textual criticism Greenlee begins this volume by explaining the production of ancient manuscripts He then traces the history of the development of the New Testament text Readers are next introduced to the basic principles of textual criticism the concept of variant readings and how to determine which variant has the greatest likelihood of being the original reading To illustrate the basic principles several sample New Testament texts are examined The book concludes by putting textual criticism in perspective as involving only a minute portion of the entire New Testament text the bulk of which is indisputably attested by the manuscripts

*A Priced Catalogue of the Whole Stock of Theological Books, for the Most Part Second* Charles Higham, 1878 **The Pre-Nicene New Testament** Robert M. Price, 2006 In this monumental work Professor Price offers an inclusive New Testament canon with twenty seven additional sacred books from the first three centuries of Christianity including a few of the Dead Sea Scrolls and Nag Hammadi writings Price also reconstructs the Gospel of Marcion and the lost Gospel according to the Hebrews Here for the first time is a canon representing all major factions of the early church As an interpretive translation Price's text is both accurate and readable and is tied more closely to the Greek than most previous translations Price conveys the meanings of words in context carefully choosing the right

phrase or idiom to convey their sense in English For words that had a specific theological import when first written Price leaves the Greek transliteration giving readers archons for the fallen angels thought to be ruling the world paraclete for encourager andpleroma for the Gnostic godhead Within the collection each book is introduced with comments about the cultural setting information about when a document was probably written and significant textual considerations which together form a running commentary that continues into the footnotes The findings of scholars documented and summarized by Price will come as a surprise to some readers It appears as Price suggests that most of what is known about Jesus came by way of revelation to Christian oracles rather than by word of mouth as historical memory In addition the major characters in the New Testament including Peter Stephen and Paul appear to be composites of several historical individuals each their stories comprising a mix of events legend and plot themes borrowed from the Old Testament and Greek literature In the New Testament world theology developed gradually along different trajectories with tension between the charismatic ascetics such as Marcion and Thecla as examples and the emerging Catholic orthodoxy of such clergy as Ignatius and Polycarp The tension is detectable in the texts themselves many of which represent heretical points of view Gnostic Jewish Christian Marcionite and proto orthodox and were later edited sometimes clumsily in an attempt to harmonize all into one consistent theology What may occur to many readers among the more striking aspects of the narratives is that the earliest most basic writings such as Mark s Gospel in inarticulate Greek are ultimately more impressive and inspirational than the later attempts by more educated Christians to appeal to sophisticated readers with better grammar and more allusions to classical mythology and apologetic embellishments The critical insights and theories on display in these pages have seldom been incorporated into mainstream conservative Bible translations and in many ways Price has made the New Testament a whole new book for readers allowing them by virtue of the translation to comprehend the meaning of the text where it is obscured by the traditional wording Whatever usefulness teachers students and clergy may find here in terms of pedagogical and inspirational value The Pre Nicene New Testament is guaranteed to provoke further thought and conversation among the general public hopefully toward the goal of more personal study and insights [The Holy Bible Containing the Old and New Testaments](#) Adam Clarke,1843
