Timber War:

Slopoverters Stephen J. Pyne, 2019-04-02 America is not simply a federation of states but a confederation of regions Some have always held national attention some just for a time *Slopoverters* examines three regions that once dominated the national narrative and may now be returning to prominence The Mid American oak woodlands were the scene of vigorous settlement in the late eighteenth and early nineteenth centuries and thus the scene of changing fire practices The debate over the origin of the prairies by climate or fire foreshadowed the more recent debate about fire in oak and hickory hardwoods In both cases today's thinking points to the critical role of fire The Pacific Northwest was the great pivot between laissez faire logging and state sponsored conservation and the fires that would accompany each Then fire faded as an environmental issue But it has returned over the past decade like an avenging angel forcing the region to again consider the defining dialectic between axe and flame And Alaska Alaska is different as everyone says It came late to wildland fire protection then managed an extraordinary transfiguration into the most successful American region to restore something like the historic fire regime But Alaska is also a petrostate and climate change may be making it the vanguard of what the Anthropocene will mean for American fire overall *Slopoverters* collates surveys of these three regions into the national narrative With a unique mixture of journalism history and literary imagination renowned fire expert Stephen J Pyne shows how culture and nature fire from nature and fire from people interact to shape our world with three case studies in public policy and the challenging questions they pose about the future we will share with fire

Trouble in the Forest Richard Widick, Wars over natural resources have been fiercely fought in the Humboldt Bay redwood region of Northern California a situation made devastatingly urgent in recent decades of timber war that raised questions of economic sustainability and ecological preservation In *Trouble in the Forest* Richard Widick narrates the long and bloody history of this hostility and demonstrates how it exemplifies the key contemporary challenge facing the modern societies the collision of capitalism ecology and social justice An innovative blend of social history cultural theory and ethnography *Trouble in the Forest* traces the origins of the redwood conflict to the same engines of modernity that drove the region's colonial violence against American Indians and its labor struggles during the industrial revolution Widick describes in vivid detail the infamous fight that ensued when Maxxam Inc started clearing ancient forests in Humboldt after acquiring the Pacific Lumber Company in 1985 but he also reaches further back and investigates the local Indian clashes and labor troubles that set the conditions of the timber wars Seizing on public flash points of each confrontation including the massacre of Wiyot on Indian Island in 1860 the machine gunning of redwood strikers by police and company thugs during the great lumber strike of 1935 and the car bombing of forest defenders in 1990 Widick maps how the landscape has registered the impact of this epochal struggle and how the timber wars embody the forces of market capitalism free speech and liberal government Showing how events such as an Indian massacre and the death of a protester at the hands of a logger create the social memory and culture of timber production and environmental

resistance now emblematic of Northern California's redwood region. Trouble in the Forest ultimately argues that the modern social imaginary produced a perpetual conflict over property that fueled the timber wars as it pushed toward the western frontier: first property in land, then in labor, and now in environment.

From boreal Alaska to subtropical Florida, from the chaparral of California to the pitch pine of New Jersey, America boasts nearly a billion burnable acres. In nine previous volumes, Stephen J. Pyne has explored the fascinating variety of flame region by region. In *To the Last Smoke: An Anthology*, he selects a sampling of the best from each. *To the Last Smoke* offers a unique and sweeping view of the nation's fire scene by distilling observations on Florida, California, the Northern Rockies, the Great Plains, the Southwest, the Interior West, the Northeast, Alaska, the oak woodlands, and the Pacific Northwest into a single, readable volume. The anthology functions as a color commentary companion to the play-by-play narrative offered in Pyne's *Between Two Fires: A Fire History of Contemporary America*. The series is Pyne's way of keeping with it to the end, encompassing the directive from his rookie season: to stay with every fire to the last smoke.
