Valuing Agroforestry Systems Methods And Applications:

Valuing Agroforestry Systems Janaki R.R. Alavalapati, D. Evan Mercer, 2006-03-30 The primary objective of this book is to offer practical means for strengthening the economics and policy dimension of the agroforestry discipline This book written by the leading experts in economics and agroforestry encompasses case studies from Australia China Kenya India Indonesia Malawi Mexico Micronesia Tanzania United Kingdom United States Zambia and Zimbabwe The applied economic methodologies encompass a wide variety of case studies including enterprise farm budget models through Faustmann models Policy Analysis Matrix production function approach risk assessment models dynamic programming linear programming meta modeling contingent valuation attribute based choice experiments econometric modeling and institutional economic analysis It is our belief that these methodologies help agroforestry students and professionals conduct rigorous assessment of economic and policy aspects of agroforestry systems and to produce less biased and more credible information Furthermore the economic and policy issues explored in the book profitability environmental benefits risk reduction household constraints rural development and institutional arrangements are central to further agroforestry adoption in both tropical and temperate regions All of the chapters in this volume were subject to rigorous peer review by at least one other contributing author and one external reviewer We would like to acknowledge the indispensable collaboration of those who provided careful external reviews Ken Andrasko Chris Andrew Peter Boxall Norman Breuer Bill Hyde Tom Holmes Sherry Larkin Jagannadharao Matta Venkatrao Nagubadi Roz Naylor Thomas Randolph Gerald Shively Changyou Sun Bo Jellesmark Thorsen and Yaoqi Zhang All reviews were coordinated by the book editors Handbook of Forest Resource Economics Shashi Kant, Janaki

Alavalapati, 2014-04-03 It is increasingly recognized that the economic value of forests is not merely the production of timber Forests provide other key ecosystem services such as being sinks for greenhouse gases hotspots of biodiversity tourism and recreation They are also vitally important in preventing soil erosion and controlling water supplies as well as providing non timber forest products and supporting the livelihoods of many local people This handbook provides a detailed comprehensive and broad coverage of forest economics including traditional forest economics of timber production economics of environmental role of forests and recent developments in forest economics The chapters are grouped into six parts fundamental topics in forest resource economics economics of forest ecosystems economics of forests climate change and bioenergy economics of risk uncertainty and natural disturbances economics of forest property rights and certification and emerging issues and developments Written by leading environmental forest and natural resource economists the book represents a definitive reference volume for students of economics environment forestry and natural resource economics and management Nature-based Solutions for Resilient Ecosystems and Societies Shalini Dhyani, Anil Kumar Gupta, Madhav Karki, 2020-07-07 Over the past few decades the frequency and severity of natural and human induced disasters have increased across Asia These disasters lead to substantial loss of life livelihoods and community assets which not only

threatens the pace of socio economic development but also undo hard earned gains Extreme events and disasters such as floods droughts heat fire cyclones and tidal surges are known to be exacerbated by environmental changes including climate change land use changes and natural resource degradation Increasing climate variability and multi dimensional vulnerabilities have severely affected the social ecological and economic capacities of the people in the region who are economically speaking those with the least capacity to adapt Climatic and other environmental hazards and anthropogenic risks coupled with weak and wavering capacities severely impact the ecosystems and Nature s Contributions to People NCP and thereby to human well being Long term resilience building through disaster risk reduction and integrated adaptive climate planning therefore has become a key priority for scientists and policymakers alike Nature based Solutions NbS is a cost effective approach that utilizes ecosystem and biodiversity services for disaster risk reduction and climate change adaptation while also providing a range of co benefits like sustainable livelihoods and food water and energy security This book discusses the concept of Nature based Solutions NbS both as a science and as art and elaborates on how it can be applied to develop healthy and resilient ecosystems locally nationally regionally and globally The book covers illustrative methods and tools adopted for applying NbS in different countries The authors discuss NbS applications and challenges research trends and future insights that have wider regional and global relevance The aspects covered include landscape restoration ecosystem based adaptation ecosystem based disaster risk reduction ecological restoration ecosystem based protected areas management green infrastructure development nature friendly infrastructure development in various ecosystem types agro climatic zones and watersheds The book offers insights into understanding the sustainable development goals SDGs at the grass roots level and can help indigenous and local communities harness ecosystem services to help achieve them It offers a unique essential resource for researchers students corporations administrators and policymakers working in the fields of the environment geography development policy planning the natural sciences life sciences agriculture health climate change and disaster studies *Animal Science Reviews 2011* David Hemming,2012 *Animal Science Reviews 2011* provides scientists and students in animal science with timely analysis on key topics in current research Originally published online in *CAB Reviews* this volume makes available in printed form the reviews in animal science published during 2011 **Payment for Environmental Services in Agricultural Landscapes** Leslie Lipper,Takumi Sakuyama,Randy Stringer,David Zilberman,2009-03-21 In recent years development policy has responded to an increasing concern about natural resource degradation by setting up innovative payment for environmental services PES programs in developing countries PES programs use market and institutional incentives in order to meet both environmental and poverty alleviation objectives However their optimal design implications for the rural poor and how these initiatives integrate into international treaties on global warming and biodiversity loss are still being discussed This book addresses these issues by scrutinizing analytical tools providing policy insights and stimulating debate on linkages between poverty

alleviation and environmental protection In particular it turns attention towards the role of environmental services in agricultural landscapes as they provide a living for many poor in developing countries It serves as a valuable reference for academics and students in various disciplines as well as for policy makers and advisors This book is a co publication between Springer and the Food and Agriculture Organization of the United Nations

Forestry for a Carbon-Neutral and Sustainable Future Hukum Singh,2026-01-01 This book offers a comprehensive exploration of forestry s transformative role in combating climate change and fostering sustainability It explores the scientific foundations of how forests contribute to carbon neutrality and sustainability highlighting their crucial role in mitigating greenhouse gas emissions and enhancing global climate resilience Focusing on the latest research and innovative practices provides a deep understanding of how effective forest management may drive progress toward a carbon neutral world The book also explores the intersection of forestry with the Sustainable Development Goals SDGs highlighting its impact on issues such as poverty alleviation food security clean energy climate change biodiversity conservation etc Integrating scientific research with practical insights into forestry may address multiple global challenges while fostering resilient and sustainable communities This book designed for policymakers forest managers and researchers offers a comprehensive guide to understanding and utilizing forestry s potential in global climate strategies It serves as a vital resource for those seeking to advance sustainable forestry practices and make informed decisions towards a carbon neutral and sustainable future
