Clark, 2000-09-18 This stimulating and wide ranging book mounts a profound enquiry into some of the most pressing questions of our age by examining the relationship between biological science and Christianity The history of biological discovery is explored from the point of view of a leading philosopher and ethicist What effect should modern biological theory and practice have on Christian understanding of ethics How much of that theory and practice should Christians endorse Can Christians for example agree that biological changes are not governed by transcendent values or that there are no clear or essential boundaries between species To what extent can Nature set our standards Professor Clark takes a reasoned look at biological theory since Darwin and argues that an orthodox Christian philosophy is better able to accommodate the truth of such theory than is the sort of progressive meliorist interpretation of Christian doctrine which is usually offered as the properly modern option
