The Art of Writing and Speaking the English Language Sherwin Cody,2014-03-30 The Art of Writing and Speaking the English Language Sherwin Cody If there is a subject of really universal interest and utility it is the art of writing and speaking one's own language effectively It is the basis of culture as we all know but it is infinitely more than that it is the basis of business No salesman can sell anything unless he can explain the merits of his goods in effective English among our people or can write an advertisement equally effective or present his ideas and the facts in a letter Indeed the way we talk and write letters largely determines our success in life Now it is well for us to face at once the counter statement that the most ignorant and uncultivated men often succeed best in business and that misspelled ungrammatical advertisements have brought in millions of dollars It is an acknowledged fact that our business circulars and letters are far inferior in correctness to those of Great Britain yet they are more effective in getting business As far as spelling is concerned we know that some of the masters of literature have been atrocious spellers and many suppose that when one can sin in such company sinning is as we might say a beauty spot a defect in which we can even take pride

The Art of Writing and Speaking the English Language Sherwin Cody,2016-12-03 Do You Make These Mistakes in English Sherwin Cody was an American writer and entrepreneur who developed a long running home study course in speaking and writing with an advertisement with this title A critic of traditional English education Cody

advocated colloquial style and grammar He asked What is the reason so many of us are deficient in the use of English and find our careers stunted in consequence Why is it some cannot spell correctly and others cannot punctuate Why do so many find themselves at a loss for words to express their meaning adequately The reason for the deficiency is clear Most persons do not write or speak good English simply because they never formed the habit of doing so Most persons use only common words colorless flat ordinary Their speech and their letters are lifeless monotonous humdrum If there is a subject of really universal interest and utility it is the art of writing and speaking one s own language effectively It is the basis of culture as we all know but it is infinitely more than that it is the basis of business No salesman can sell anything unless he can explain the merits of his goods in effective English among our people or can write an advertisement equally effective or present his ideas and the facts in a letter The way we talk and write letters largely determines our success in life Now it is well for us to face at once the counter statement that the most ignorant and uncultivated men often succeed best in business and that misspelled ungrammatical advertisements have brought in millions of dollars As far as spelling is concerned we know that some of the masters of literature have been atrocious spellers and many suppose that when one can sin in such company sinning is as we might say a beauty spot a defect in which we can even take pride There is a general belief that while bad air may be a positive evil influence incorrect use of language is at most no more than a negative evil that while it may be a good thing to be correct no special harm is involved in being incorrect The ordinary person conceives of good use of language as an accomplishment to be learned from books a prim system of genteel manners to be put on when occasion demands a sort of superficial education in the correct thing or as the boys would say the proper caper In this however he is mistaken Language which expresses the thought with strict logical accuracy is correct language Language which is sufficiently rich in its resources to express thought fully is effective language If the writer or speaker has a sufficient stock of words and forms at his disposal he has only to use them in a strictly logical way and with sufficient fullness to be both correct and effective The unfortunate thing is that teachers of language have failed to go to the root of the trouble and enormous effort has counted for nothing and besides has led to discouragement The right kind of language teaching will give us power a kind of eloquence a skill in the use of words That help us to write advertisements that pull business write letters that win customers and speak in effective ways to sell goods From the Introduction Those who take advantage of this study gain something so priceless that it cannot be measured in terms of money They gain a facility in speech that marks them as educated people in whatever society they find themselves They gain the self confidence and self respect which this ability inspires This is a classic reference that belongs on every writer s shelf Get Your Copy Now *The Language of Composition* Renee H.
