Simon Hajdini, 2024-03-05 How our sense of smell engages with philosophy psychoanalysis and political economy and how it can help enrich our understanding of the nature of truth language economy and sexuality Why is it that in Indo European languages at least we have no language to describe smells leaving us and famously Juliet no choice but to call the scent of a rose simply sweet In What's That Smell a groundbreaking exploration of the intersection between philosophy psychoanalysis and the oft neglected sense of smell Simon Hajdini sets out to answer this complex question Through new readings of traditional and modern philosophical texts Hajdini places smell at the very center of a philosophical critique of the traditional notion of truth challenging the idea that smell is the antiphilosophical sense par excellence Through fresh engagements with fundamental philosophical issues original analyses of modern literature and film and the novel use of scientific research into smell within a humanities context Hajdini situates problems of olfaction at the very point of inception of cultural life He proposes that ontology civilization and capitalist economy alike can be said to amount to shit management And only by following the philosophically most deplorable of the senses the book argues can we better understand the central philosophical psychoanalytical and political issues of truth sex and exploitation **COLLECTED**
