Public Libraries in the Smart City
Dale Leorke, Danielle Wyatt, 2018-10-10 Far from heralding their demise digital technologies have led to a dramatic transformation of the public library Around the world libraries have reinvented themselves as networked hubs community centres innovation labs and makerspaces Coupling striking architectural design with attention to ambience and comfort libraries have signaled their desire to be seen as both engines of innovation and creative production and hearts of community life This book argues that the library's transformation is deeply connected to a broader project of urban redevelopment and the transition to a knowledge economy In particular libraries have become entangled in visions of the smart city where densely networked ubiquitous connectivity promises urban prosperity built on efficiency innovation and new avenues for civic participation Drawing on theoretical analysis and interviews with library professionals policymakers and users this book examines the inevitable tensions emerging when a public institution dedicated to universal access to knowledge and a shared public culture intersects with the technology driven entrepreneurialist ideals of the smart city
