Treating Eating Disorders with DBT , Sustainable Approaches to Public Health Via Food Policy Actions Maria Vittoria Conti,Lidia Daimiel,Angeliki Sofroniou ,Carlotta Franchi,2026-02-26 The complexity of food systems which aim for a sustainable approach requires a more holistic and coordinated interaction Many food security and nutrition challenges are complex problems whose solutions are contested and which transcend disciplinary divisional and institutional boundaries In increasingly globalized food systems these challenges result from interactions across different scales and levels They require integrated actions taken by all stakeholders at local national regional and global levels by both public and private actors and across multiple fronts not only in agriculture but also in trade policy health environment gender norms education transport and infrastructure and so on It requires a synergetic merging rather than a destructive clashing of the ideas emerging from these various angles The aim of this research is to create new perspectives for an integrated approach that is able to support citizens in the transition of healthy and sustainable diets It will be crucial to give space to concrete actions that connect the worlds of science and policy Evidence based policymaking timely responses to emerging issues building trust promoting sustainability enhancing public engagement and fostering interdisciplinary approaches are all benefits of bridging this communication gap By fostering a culture of continuous dialogue and collaboration it is possible to develop and to implement public health policies that are both scientifically informed and practically effective leading to better health outcomes for all in a direction of sustainability

Nutrient Metabolism and Complications of Type 2 Diabetes Mellitus Hongji Zhang,Rong Huang,Qingqing Yin,Haoqiang Zhang ,Shaohua Wang,2026-03-17 The nutrient metabolism of patients with type 2 diabetes mellitus T2DM is closely linked to diabetes related complications Nutrient metabolism disorders particularly those involving glucose cholesterol fatty acids uric acid amino acids and vitamins metabolism are not only associated with classic complications of diabetes such as diabetic cerebrovascular disease cardiovascular disease nephropathy retinopathy and peripheral neuropathy but also with potential diabetic outcomes like cognitive dysfunction abnormal bone metabolism metabolic fatty liver disease and sarcopenia Currently there is extensive research on the relationship between nutrient metabolism and classic complications and comorbidities of diabetes However studies focusing on non classical complications such as cognitive dysfunction bone metabolism abnormalities metabolic fatty liver disease and sarcopenia are still scarce Therefore there is an urgent need to delve into this under researched area specifically the relationship between nutrient metabolism and these non classical complications This relationship encompasses not only the occurrence of these complications but also their progression and key events such as dementia fractures hospitalization mortality or the progression to advanced stages of disease like the transition from metabolic fatty liver to metabolic steatohepatitis and even the development of hepatocellular carcinoma This Research Topic aims to explore the relationship between nutrient metabolism including glucose cholesterol fatty acids uric acid amino acids and vitamins metabolism and diabetic complications including above mentioned classical complications and non classical complications in various populations e g different age and genders from the perspective of clinical nutrition Special attention will be given to the less commonly recognized non classical complications in patients with T2DM We hope that these studies will shed light on the key nutrient metabolism factors influencing patient outcomes and potentially lead to the development of appropriate intervention strategies in patients with T2DM We welcome submissions including but not limited to the following aspects The relationship between nutrient metabolism and cognitive impairment in patients with T2DM particularly its connection to mild cognitive impairment and dementia as well as the role of nutrient metabolism in the progression from mild cognitive impairment to dementia among patients with T2DM The relationship between nutrient metabolism and abnormal bone metabolism in patients with T2DM The relationship between nutrient metabolism and metabolic fatty liver disease in patients with T2DM particularly its connection to the transition from metabolic fatty liver to metabolic steatohepatitis and even the development of hepatocellular carcinoma The relationship between nutrient metabolism and sarcopenia in patients with T2DM Other classic

complications of T2DM related to nutrient metabolism not yet addressed in previous studies represent an intriguing area of research Phototherapeutic Approaches to Neurodegeneration Hagera Dilnashin, Surya Pratap Singh, 2026-01-01 This

book provides a comprehensive exploration of the role of plant based medicines or phytomedicine in the prevention and treatment of neurodegenerative disorders It delves into how various phytochemicals can modulate key biological pathways involved in diseases like Alzheimer s Parkinson s and other neurodegenerative conditions The chapters highlight the importance of phytopharmacological agents such as polyphenols curcumin and resveratrol in targeting oxidative stress protein aggregation and inflammation Later a few chapters discuss how polyphenols help protect mitochondria and some explore curcumin s role in regulating the mTOR and autophagy pathways This book is an excellent resource for researchers in neuroscience pharmacology and natural medicine as well as practitioners seeking holistic approaches to neurological health

**Reactive Oxygen Species in Metabolic Inflammation** Sumel Ashique, Neeraj Mishra, 2026-02-06 Reactive oxygen species ROS mediated inflammation plays a critical role in the onset and progression of various metabolic disorders including obesity diabetes and non alcoholic fatty liver disease NAFLD Dysregulated ROS production leads to oxidative stress which triggers chronic low grade inflammation disrupting cellular homeostasis and metabolic functions This pathological interplay exacerbates insulin resistance lipid accumulation and mitochondrial dysfunction creating a vicious cycle of metabolic dysregulation Understanding the molecular mechanisms behind ROS mediated inflammation is crucial for developing targeted therapeutic interventions to break this cycle and mitigate disease progression This comprehensive book bridges the gap between fundamental molecular insights and translational therapeutic strategies It begins by delving into the signaling pathways involved such as NF B and Nrf2 and highlighting the role of key players like mitochondria and antioxidant systems Later chapters explore emerging therapeutic approaches including postbiotics natural antioxidants and pharmacological agents offering practical solutions for managing metabolic disorders By addressing this critical intersection of inflammation oxidative stress and metabolism this book is a valuable guide for researchers clinicians and healthcare professionals who aim to tackle the global burden of metabolic diseases effectively *Poultry Science* ,1992 Vol 5 includes a

inflammation which are critical for cognitive health and mood regulation This research background highlights the necessity for a deeper understanding of lipid metabolism s impact on neurological and psychiatric conditions offering the potential for novel therapeutic targets and early diagnostic markers The primary objective of this research is to elucidate the intricate interplay between lipid metabolism and its implications for the progression of neurological diseases and mental disorders We aim to investigate how the dysregulation of lipid homeostasis contributes to the pathogenesis of conditions By employing cutting edge molecular biology techniques we will identify key lipid species and metabolic pathways disrupted in these disorders Our research will also explore the potential of modulating lipid metabolism as a therapeutic strategy to ameliorate disease symptoms and halt disease progression Ultimately we seek to enhance the understanding of lipid mediated mechanisms in neurodegenerative and psychiatric conditions paving the way for novel targeted interventions We welcome manuscript submissions of all types including original studies method papers reviews perspectives and case reports Submissions may encompass clinical trials and basic in vivo or in vitro studies Themes for submission include but are not limited to the following Lipid metabolism in neurological diseases e g epilepsy Parkinson s disease Alzheimer s disease Lipid metabolism in mental disorders e g schizophrenia major depressive disorder generalized anxiety disorder Neurosteroids in brain diseases Gut brain axis in neurological diseases and mental disorders Treatment or intervention in neurological diseases and mental disorders through lipid metabolic regulation Treatment or intervention on neurological disease and mental disorders through lipid metabolic regulation
