Comparative Competition Law John Duns, Arlen Duke, Brendan Sweeney, 2015-11-27

Comparative Competition Law examines the key global issues facing competition law and policy. This volume's specially commissioned chapters by leading writers from the United States, Europe, Asia, South America, and Australia provide a synthesis of how these current issues are addressed by drawing on the approaches taken in different jurisdictions around the world. Expert contributors examine the regulation of core competitive conduct by comparing substantive law approaches in the US and the EU. The book then explores issues of enforcement such as the regulator's powers, whether to criminalize anti-competitive conduct, the degree to which private enforcement ought to be encouraged, and the extraterritorial scope of domestic laws. Finally, the book discusses how competition law is being implemented in a variety of countries including Japan, China, Brazil, Chile, and Colombia. This scholarly analysis of the key substantive, procedural, and remedial challenges facing global competition law policymakers offers a comparative framework to facilitate a better understanding of relevant policies. This collection of global perspectives will be of great interest to scholars and students of competition law, microeconomics, and regulatory studies. Competition law regulators, policy makers, and law practitioners will also find this book an invaluable resource.

Anti-Cartel Enforcement in a Contemporary Age Caron Beaton-Wells, Christopher Tran, 2015-09-24

Leniency policies are seen as a revolution in contemporary anti-cartel law enforcement. Unique to competition law, these policies are regarded as essential to detecting, punishing, and deterring business collusion conduct that subverts competition at national and global levels. Featuring contributions from leading scholars, practitioners, and enforcers from around the world, this book probes the almost universal adoption and zealous defence of leniency policies by many competition authorities and others. It charts the origins of and impetuses for the leniency movement, captures key insights from academic research and practical experience relating to the operation and effectiveness of leniency policies, and examines leniency from the perspectives of corporate and individual applicants, advisers, and authorities. The book also explores debates surrounding the intersections between leniency and other crucial elements of the enforcement system, such as compensation, compliance, and criminalisation. The rich critical analysis in the book draws on the disciplines of law, regulation, economics, and criminology. It makes a substantial and distinctive contribution to the literature on a topic that is highly significant to a wide range of actors in the field of competition law and business regulation, generally. From the Foreword by Professor Fredric Jenny, fundamental questions are raised and thoroughly discussed in this book, which is undoubtedly the most comprehensive scholarly work on leniency policies produced so far. The book should be required reading for all seeking to acquire a deeper insight into the issues related to leniency policy. It is a priceless contribution.

The Goals of Competition Law Daniel Zimmer, 2012. What are the normative foundations of competition law? That is the question at the heart of this book. Leading scholars consider whether this branch of law serves just one or more than one goal, and if it serves to protect unfettered competition, as such, how this goal relates to other objectives, such as the promotion of economic welfare. The book brings together contributions on the relevance of different welfare standards, on the concept of freedom to compete, and on distributional fairness as a goal.
