highlights the stories of six designers whose inspiring creativity produced aircraft engines and weapons ranging from Camel to Concorde Fury to Harrier Wellington to Viscount Merlin to Olympus Between them Thomas Sopwith Barnes Wallis Rex Pierson Sydney Camm Stanley Hooker and George Edwards were responsible for much of what was designed built and flown not only at Brooklands but elsewhere too The book is arranged in successive historical episodes but the many links between the objects and the designers should allow readers to follow different paths if they so wish It is not intended as a technical reference but rather to inspire the reader to seek out the objects and discover more about them [De Havilland DH.106 Comet](#) Wolfgang Borgmann,2024-04-28 This book is the perfect addition to the A Legends of Flight Illustrated History series As the first jetliner operated in scheduled service the de Havilland Comet is a very important aircraft type in airline history It set the standards for modern air transport and is therefore a MUST for this book series **British Aircraft Corporation** Stephen Skinner,2012-08-01 The British Aircraft Corporation was formed from The Bristol Aeroplane Company English Electric Vickers Armstrong and Hunting in 1960 In its short seventeen year life the British Aircraft Corporation built some of the most important aircraft and missiles of the 1960s 1970s and beyond its best known products included the Jaguar and Tornado warplanes Rapier missile and One Eleven airliner It was also responsible for the stillborn TSR2 strike aircraft the 1965 cancellation of which remains controversial to this day Most famously the Anglo French Concorde supersonic airliner came from the BAC stable BAC was subsumed into British Aerospace now BAE Systems in 1977 but many of its products remain in service to this day This book tells their complete story **Air University Library Index to Military Periodicals** ,1962 **Accelerating Sustainable Aviation Initiatives** Luiz Manuel Braga da Costa Campos,2025-02-13 Accelerating Sustainable Aviation Initiatives Markets Economics and Social Issues examines the twin challenges of clean aviation and the industry s ongoing recovery from the COVID 19 crisis The book looks at integrated technologies and societal issues driving aircraft design certification operational performance maintenance and safety Coverage includes emerging technologies for low emissions and the evolution of aircraft fleets toward zero environmental impact the effects of COVID 19 and economic efficiency and market implications of renewing current fleets to meet environmental targets The book will be of keen interest to professionals and researchers interested in emerging technologies for clean aviation and the industry s emergence from the COVID 19 crisis **Vc10** Stephen Skinner,2022-12-30 One of the truly iconic jet airliners the Vickers VC10 is superb example of British engineering that left a lasting impression on many those who flew it as pilots or in it as crew or passengers those who worked on the initial design manufacturing or maintenance programs or those many more who simply saw it in the skies After 51 years in the air the VC10s are now retired but readers can relive its heyday in Key Publishing s new 116 page special perfect bound tribute to the type VC10 magazine looks at the type s development its service with the RAF including the Gulf War and operations over Iraq plus data files and production lists This 116 page special publication pays tribute to this legend of the skies [Air University Periodical Index](#) ,1961 **Air Pictorial** ,2002
