

Victorian Science Religion

Aileen Fyfe

Victorian Science Religion:

Science and Religion in Neo-Victorian Novels John Glendening, 2013-04-17 Criticism about the neo Victorian novel a genre of historical fiction that re imagines aspects of the Victorian world from present day perspectives has expanded rapidly in the last fifteen years but given little attention to the engagement between science and religion Of great interest to Victorians this subject often appears in neo Victorian novels including those by such well known authors as John Fowles A S Byatt Graham Swift and Mathew Kneale This book discusses novels in which nineteenth century science including geology paleontology and evolutionary theory interacts with religion through accommodations conflicts and crises of faith In general these texts abandon conventional religion but retain the ethical connectedness and celebration of life associated with spirituality at its best Registering the growth of nineteenth century secularism and drawing on aspects of the romantic tradition and ecological thinking they honor the natural world without imagining that it exists for humans or functions in reference to human values In particular they enact a form of wonderment the capacity of the mind to make sense of creatively adapt and enjoy the world out of which it has evolved in short to endow it with meaning Protagonists who come to experience reality in this expansive way release themselves from self anxiety and alienation In this book Glendening shows how by intermixing past and present fact and fiction neo Victorian narratives with a few instructive exceptions manifest this pattern

Victorian Science and Religion Sydney Eisen, Bernard V. Lightman, 1984 Science, Religion, and the Human Future Amanda Rees, Franziska E. Kohlt, Tom McLeish, Charlotte Sleigh, David Wilkinson, 2025-12-18 Science Religion and the Human Future Conflict Collusion and Consequences demonstrates that the myth of an inevitable conflict between science and faith is based on a misunderstanding of history with potentially adverse consequences for human futures The work focuses first upon ancient medieval and Islamic scholars and the intimate connections they made between theology and the investigation of the natural world and why we know so little about them Moving into the modern era it argues that one of the most concerning features of the science faith relationship was their collusion in defining and validating the civilising mission of Western imperialism This collusion recontextualises the creation of the conflict thesis Turning to the present day the book investigates episodes of scientific controversy in which effective science communication was hindered not as a result of a clash between science and faith but because of a close and unexamined entanglement between the two In cases ranging from space colonisation to AI climate change to Covid 19 the problem is not so much science s split from faith as the unexamined and problematic theologies that remain implicit within it Learning from these examples the book outlines some productive and non conflict based frameworks for talking about science and faith in the future

Science, Religion, and the Protestant Tradition James C. Ungureanu, 2019-10-03 The story of the conflict thesis between science and religion the notion of perennial conflict or warfare between the two is part of our modern self understanding As the story goes John William Draper 1811 1882 and Andrew Dickson White 1832 1918 constructed dramatic narratives in the nineteenth century

that cast religion as the relentless enemy of scientific progress And yet despite its resilience in popular culture historians today have largely debunked the conflict thesis Unravelling its origins James Ungureanu argues that Draper and White actually hoped their narratives would preserve religious belief For them science was ultimately a scapegoat for a much larger and more important argument dating back to the Protestant Reformation where one theological tradition was pitted against another a more progressive liberal and diffusive Christianity against a more traditional conservative and orthodox Christianity By the mid nineteenth century narratives of conflict between science and religion were largely deployed between contending theological schools of thought However these narratives were later appropriated by secularists freethinkers and atheists as weapons against all religion By revisiting its origins development and popularization Ungureanu ultimately reveals that the conflict thesis was just one of the many unintended consequences of the Protestant Reformation

Rethinking History, Science, and Religion Bernard Lightman,2019-10-03 The historical interface between science and religion was depicted as an unbridgeable conflict in the last quarter of the nineteenth century Starting in the 1970s such a conception was too simplistic and not at all accurate when considering the totality of that relationship This volume evaluates the utility of the complexity principle in past present and future scholarship First put forward by historian John Brooke over twenty five years ago the complexity principle rejects the idea of a single thesis of conflict or harmony or integration or separation between science and religion Rethinking History Science and Religion brings together an interdisciplinary group of scholars at the forefront of their fields to consider whether new approaches to the study of science and culture such as recent developments in research on science and the history of publishing the global history of science the geographical examination of space and place and science and media have cast doubt on the complexity thesis or if it remains a serviceable historiographical model Victorian Science and Literature Gowan Dawson,Bernard Lightman,Richard England,Jude V. Nixon,2011 **The Routledge Research Companion to Nineteenth-Century British Literature and Science** John Holmes,Sharon Ruston,2017-05-18 Tracing the continuities and trends in the complex relationship between literature and science in the long nineteenth century this companion provides scholars with a comprehensive authoritative and up to date foundation for research in this field In intellectual material and social terms the transformation undergone by Western culture over the period was unprecedented Many of these changes were grounded in the growth of science Yet science was not a cultural monolith then any more than it is now and its development was shaped by competing world views To cover the full range of literary engagements with science in the nineteenth century this companion consists of twenty seven chapters by experts in the field which explore crucial social and intellectual contexts for the interactions between literature and science how science affected different genres of writing and the importance of individual scientific disciplines and concepts within literary culture Each chapter has its own extensive bibliography The volume as a whole is rounded out with a synoptic introduction by the editors and an afterword by the eminent historian of nineteenth century science Bernard

Lightman *Science and Salvation* Aileen Fyfe, 2004-07-17 Threatened by the proliferation of cheap mass produced publications the Religious Tract Society issued a series of publications on popular science during the 1840s The books were intended to counter the developing notion that science and faith were mutually exclusive and the Society's authors employed a full repertoire of evangelical techniques low prices simple language carefully structured narratives to convert their readers The application of such techniques to popular science resulted in one of the most widely available sources of information on the sciences in the Victorian era A fascinating study of the tenuous relationship between science and religion in evangelical publishing *Science and Salvation* examines questions of practice and faith from a fresh perspective Rather than highlighting works by expert men of science Aileen Fyfe instead considers a group of relatively undistinguished authors who used thinly veiled Christian rhetoric to educate first but to convert as well This important volume is destined to become essential reading for historians of science religion and publishing alike *Victorian Science* George Basalla, William R. Coleman, Robert Hugh Kargon, 1970 **Victorian Science and Victorian Values** James G. Paradis, 1985 **Science, Religion and Reality** Arthur James Balfour, 1926 **Facets of Faith and Science: Historiography and modes of interaction** Jitse M. van der Meer, 1996 Science, Religion, and the Human Experience James D. Proctor, 2005-04-21 This collection of essays looks at the relationship between science and religion The book begins from the premise that both science and religion operate in yet seek to reach beyond specific historical political ideological and psychological contexts *The Listener*, 1930 Facets of Faith and Science Jitse M. van der Meer, 1996-09-05 This first volume explores the specific roles of metaphysical and religious beliefs in explanation and theory construction in the natural sciences It surveys modes of interaction between religion and science paying attention to the sensitivities required for their historiography The Hibbert Journal, 1914 A quarterly review of religion theology and philosophy *John Tyndall's Transcendental Materialism and the Conflict Between Religion and Science in Victorian England* Stephen S. Kim, 1996 *Metropolitan Pulpit and Homiletic Monthly*, 1929 *Contributions of Science to Religion* Shailer Mathews, William Emerson Ritter, 1924 Religion and Science from Galileo to Bergson John Charlton Hardwick, 1920
