## **Victory Through Air Power:**

**Airpower** John Gooch,2013-11-05 The nine contributors to this volume study the rapid development of airpower during the twentieth century as well as the methodological problems involved in assessing such change **The Paths Of Heaven: The Evolution Of Airpower Theory: The School Of Advanced Airpower Studies** Philip S. Meilinger,2000 *Architect of Air Power* Brian D. Laslie,2017-10-06 A biography of the pioneering four star general chronicling his influence on the United States Air Force At age 36 Laurence S Kuter 1905 1979 became the youngest general officer since William T Sherman He served as deputy commander of allied tactical air forces in North Africa during World War II and helped devise the American bombing strategy in Europe Although his combat contributions were less notable than other commanders in the Eighth Air Force few officers saw as many theaters of operation as he did or were as highly sought after After World War II he led the Military Air Transport Service Air University Far East Air Forces and served as commander in chief of the North American Air Defense Command NORAD Despite these accomplishments and others however Kuter remains widely underappreciated In *Architect of Air Power* Brian D Laslie offers the first biography of this important but unsung pioneer whose influence can be found in every stage of the development of an independent US Air Force From his early years at West Point to his days at the Air Corps Tactical School to his leadership role at NORAD Kuter made his mark with quiet efficiency He was an early advocate of strategic bombardment rather than pursuit or fighter aviation fundamentally changing the way air power was used and later helped implement the Berlin airlift in 1948 In what would become a significant moment in military history he wrote Field Manual 100 20 which is considered the Air Force s declaration of independence from the Army Drawing on diaries letters and scrapbooks Laslie offers a complete portrait of this influential soldier *Architect of Air Power* illuminates Kuter s pivotal contributions and offers new insights into critical military policy and decision making during the Second World War and the Cold War Praise for *Architect of Air Power* Laslie expertly brings into focus perhaps the least known of the major Air Force personalities of World War II and the early Cold War Kuter was the indispensable behind the scenes man in those years and this book fills a similarly indispensable gap in our understanding of the people and ideas that propelled the nation s air arm to independence and prominence Thomas Alexander Hughes author of *Over Lord* General Pete Quesada and the *Triumph of Tactical Air Power in World War II* Laslie s outstanding work on Laurence Kuter is the first full and highly effective look at this exceptionally important airman It gives the reader ample evidence of Kuter s central role in making America the quintessential airpower nation during the course of the twentieth century This will be the book on Kuter for many years to come Robert S Ehlers Jr author of *The Mediterranean Air War Airpower and Allied Victory in World War II* **U.S. Air Services** ,1945 **Airpower Journal** ,1999 **Walt Disney** Neal Gabler,2007 His classic films illuminated everyone s childhood The theme parks are on every tourist itinerary The movie empire is one of Hollywood s biggest layers Walt Disney is one of the few men who unquestionably changed our culture Neal Gabler is the first author to

have had complete access to the Disney Archives enabling him to write the definitive biography of this remarkable man. It's a long book as Disney's achievement was so huge but a truly compulsive read. He shows how Disney built up his fledgling studio with short cartoons featuring Mickey Mouse and Donald Duck before quite simply inventing animation with full length films like Snow White, Pinocchio, and Dumbo. An astounding amount of work went into a film like Fantasia with whole crews working round the clock on a sequence a couple of minutes long only for the obsessively perfectionist Disney to order it redone. Walt's profligacy and expansionism meant it was his brother and business partner Roy who kept the company solvent. Disney then moved beyond animation with huge successes like Mary Poppins and mixed utopianism and merchandising to *The Ohio State Engineer*, 1941. Brassey's Naval Annual Earl Thomas Allnutt Brassey, 1943. **Bernard Brodie and the Foundations of American Nuclear Strategy** Barry Howard Steiner, 1991. Steiner analyzes how and why Brodie's understanding of weapons of unparalleled explosive force led him to posit the need for revolutionary strategic thinking in a broadminded analytic method and in the focus upon cities as nuclear targets. He shows the tremendous effect Brodie's work had on the intellectual climate in which policy is determined particularly in his frequent combatting of conventional wisdom.

**The First Summit** Theodore A. Wilson, 1991. In this revised edition of his classic study Theodore Wilson has expanded and updated the narrative. Drawing upon a wealth of primary sources made available since the first edition he has added nearly forty percent new material. He recaptures the drama and color of the shipboard discussions establishing the meeting at Argentia as a landmark in the history of war diplomacy. **Victory Through Air Power** Alexander Prokofieff De Seversky, 1943. Annual Report of the Director of University Extension for the Academic Year Ending June 30 ... Columbia University. University Extension, 1922. **The Political Economy of Total War** Georgetown University. School of Foreign Service, 1942. Targeting the Third Reich Robert S. Ehlers, 2009. Argues that air intelligence played a crucial but largely overlooked role in the successful execution of the Allied bombing campaigns against the Third Reich which in turn proved a decisive factor in both ending the war in Europe and ending it as soon as it did. **Bombs, Cities, and Civilians** Conrad C. Crane, 1993. As the might and capabilities of American airpower have grown during the last 60 years so has the controversy about its use in the intentional and indiscriminate wartime bombardment of civilians. In *Bombs, Cities, and Civilians* Conrad Crane maintains that for the most part American airmen in World War II remained committed to precision bombing doctrine. Instead of attacking densely populated urban areas simply to erode civilian morale Army Air Forces adhered to a policy that emphasized targeting key industrial and military sites. He demonstrates that while the British, Germans, and Japanese routinely conducted indiscriminate aerial bombardment of enemy cities American airmen consistently stayed with daylight raids against carefully selected targets especially in Europe. Daytime precision missions were usually far more dangerous than night area attacks but such Army Air Forces tactics increased bombing efficiency and also reduced the risk of civilian casualties.
