Vincken,2013-04-17 This edited volume addresses a subject which has been discussed intensively in the computer vision community for several years Performance characterization and evaluation of computer vision algorithms are of key importance particularly with respect to the configuration of reliable and robust computer vision systems as well as the dissemination of reconfigurable systems in novel application domains Although a plethora of literature on this subject is available for certain areas of computer vision the research community still faces a lack of a well grounded generally accepted and eventually standardized methods The range of fundamental problems encountered passes the value of synthetic images in experimental computer vision the selection of a representative set of real images related to specific domains and tasks the definition of ground truth given different tasks and applications the design of experimental test beds the analysis of algorithms with respect to general characteristics such as complexity resource consumption convergence stability or range of admissible input data the definition and analysis of performance measures for classes of algorithms the role of statistics based performance measures the generation of data sheets with performance measures of algorithms supporting the system engineer in his configuration problem and the validity of model assumptions for specific applications of computer vision      *Pattern Recognition* Fred A. Hamprecht,Christoph Schnörr,Bernd Jähne,2007-09-22 This book constitutes the refereed proceedings of the 29th Symposium of the German Association for Pattern Recognition DAGM 2007 It covers image filtering restoration and segmentation shape analysis and representation categorization and detection computer vision and image retrieval machine learning and statistical data analysis biomedical data analysis motion analysis and tracking stereo and structure from motion as well as 3D view registration and surface modeling      **Computer Information Systems and Industrial Management** Agostino Cortesi,Nabendu Chaki,Khalid Saeed,Ślawomir Wierzchoń,2012-09-20 This book constitutes the refereed proceedings of the 11th International Conference on Computer Information Systems and Industrial Management CISIM 2012 held in Venice Italy in September 2012 The 35 revised full papers presented together with 2 keynote talks were carefully reviewed and selected from 80 submissions The papers are organized in topical sections on security access control and intrusion detection pattern recognition and image processing biometric applications algorithms and data management networking and system models and risk assessment      **Computer Analysis of Images and Patterns** André Gagalowicz,2005-08-30 This volume presents the proceedings of the 11th International Conference on Computer Analysis of Images and Patterns CAIP 2005 This conference series started about 20 years ago in Berlin Initially the conference served as a forum for meetings between scientists from Western and Eastern block countries Nowadays the conference attracts participants from all over the world The conference gives equal

weight to posters and oral presentations and the selected presentation mode is based on the most appropriate communication medium. The program follows a single track format rather than parallel sessions. Non-overlapping oral and poster sessions ensure that all attendees have the opportunity to interact personally with presenters. As for the numbers we received a total of 185 submissions. All papers were reviewed by two to four members of the Program Committee. The final selection was carried out by the Conference Chairs. Out of the 185 papers, 65 were selected for oral presentation and 43 as posters. CAIP is becoming well recognized internationally and this year's presentations came from 26 different countries. South Korea proved to be the most active scientifically with a total of 16 accepted papers. At this point we wish to thank the Program Committee and additional referees for their timely and high quality reviews. The paper's mission and review procedure was carried out electronically. We also thank the invited speakers Reinhardt Koch and Thomas Vetter for kindly accepting to present invited papers.

*Combinatorial Image Analysis* Reinhard Klette, Jovisa Zunic, 2004-11-22. This volume presents the proceedings of the 10th International Workshop on Combinatorial Image Analysis held December 1-3, 2004 in Auckland, New Zealand. Prior meetings took place in Paris, France, 1991; Ube, Japan, 1992; Washington DC, USA, 1994; Lyon, France, 1995; Hiroshima, Japan, 1997; Madras, India, 1999; Caen, France, 2000; Philadelphia, USA, 2001; and Isero, Italy, 2003. For this workshop we received 86 submitted papers from 23 countries. Each paper was evaluated by at least two independent referees. We selected 55 papers for the conference. Three invited lectures by Vladimir Kovalevsky (Berlin), Akira Nakamura (Hiroshima), and Maurice Nivat (Paris) completed the program. Conference papers are presented in this volume under the following topical part titles: discrete tomography (3 papers), combinatorics and computational models (6), combinatorial algorithms (6), combinatorial mathematics (4), digital topology (7), digital geometry (7), approximation of digital sets by curves and surfaces (5), algebraic approaches (5), fuzzy image analysis (2), image segmentation (6), and matching and recognition (7). These subjects are dealt with in the context of digital image analysis or computer vision.
