Fleck,2017-07-05 As a biography of the fourteenth century illustrated Bible of Clement VII an opposition pope in Avignon from 1378 94 this social history traces the Bible s production in Naples c 1330 through its changing ownership and meaning in Avignon c 1340 1405 to its presentation as a gift to Alfonso King of Aragon c 1424 The author s novel approach based on solid art historical and anthropological methodologies allows her to assess the object s evolving significance and the use of such a Bible to enhance the power and prestige of its princely and papal owners Through archival sources the author pinpoints the physical location and privileged treatment of the Clement Bible over a century The author considers how the Bible s contexts in the collection of a bishop several popes and a king demonstrate the value of the Bible as an exchange commodity The Bible was undoubtedly valued for the aesthetic quality of its 200 luxurious images Additionally the author argues that its iconography especially Jerusalem and visionary scenes augments its worth as a reflection of contemporary political and religious issues Its images offered biblical precedents its style represented associations with certain artists and regions in Italy and its past provided links to important collections Fleck s examination of the art production around the Bible in Naples and Avignon further illuminates the manuscript s role as a reflection of the court cultures in those cities Adding to recent art historical scholarship focusing on the taste and signature styles in late medieval and Renaissance courts this study provides new information about workshop practices and techniques In these two court cities the author analyzes styles associated with different artists different patrons and even with different rooms of the rulers palaces offering new findings relevant to current scholarship not only in art history but also in court and collection studies **The Shallows** Nicholas Carr,2011-06-06 Finalist for the 2011 Pulitzer Prize in General Nonfiction Nicholas Carr has written a Silent Spring for the literary mind Michael Agger Slate Is Google making us stupid When Nicholas Carr posed that question in a celebrated

Atlantic Monthly cover story he tapped into a well of anxiety about how the Internet is changing us He also crystallized one of the most important debates of our time As we enjoy the Net s bounties are we sacrificing our ability to read and think deeply Now Carr expands his argument into the most compelling exploration of the Internet s intellectual and cultural consequences yet published As he describes how human thought has been shaped through the centuries by tools of the mind from the alphabet to maps to the printing press the clock and the computer Carr interweaves a fascinating account of recent discoveries in neuroscience by such pioneers as Michael Merzenich and Eric Kandel Our brains the historical and scientific evidence reveals change in response to our experiences The technologies we use to find store and share information can literally reroute our neural pathways Building on the insights of thinkers from Plato to McLuhan Carr makes a convincing case that every information technology carries an intellectual ethic a set of assumptions about the nature of knowledge and intelligence He explains how the printed book served to focus our attention promoting deep and creative thought In stark contrast the Internet encourages the rapid distracted sampling of small bits of information from many sources Its ethic is that of the industrialist an ethic of speed and efficiency of optimized production and consumption and now the Net is remaking us in its own image We are becoming ever more adept at scanning and skimming but what we are losing is our capacity for concentration contemplation and reflection Part intellectual history part popular science and part cultural criticism The Shallows sparkles with memorable vignettes Friedrich Nietzsche wrestling with a typewriter Sigmund Freud dissecting the brains of sea creatures Nathaniel Hawthorne contemplating the thunderous approach of a steam locomotive even as it plumbs profound questions about the state of our modern psyche This is a book that will forever alter the way we think about media and our minds
