Willingly Published More Papers To 2005:

'Not Theories at All but Truths' Victor Chen,2019-04-12 The only way my books can help to bring to a resolution such problems as the U S North Korean enmity is to be read and taken seriously If denuclearization is to be achieved I believe it ought not to be through the erasure of my own work but through a new understanding of many myths held by America and other powers That is the author s statement on the unique situation in which he finds himself This latest selection of his papers refers to leaders like Winston Churchill and the Kennedys to institutions like Harvard and Oxford and to illusions like the moon landings and AIDS It includes attempts to win freedom from intrusions on his mind and body some family pictures and history and an index

Existing Victor Chen,2021-02-28 Like a beachcomber searching for some lost article of value Victor Chen has browsed the internet surfed TV news channels and whiled away hours in the public library This volume brings together on paper arranged chronologically and with an index a variety of findings from the decade 2010 2021 They have been selected from out of his Facebook and Twitter platforms Like his most recent previous volumes they include a few items that might make a satisfactory newspaper column if only a newspaper would print them There are also small tidbits that might give to some newsmakers the pleasure of having been noticed In the daily information wash of life there can be stuff to occupy the mind

Hooked Howard Brody,2007-11-09 For decades medical professionals have been betraying the public s trust by accepting various benefits from the pharmaceutical industry Drug company representatives and doctors alike have promulgated creative rationalizations to portray this behavior positively as if it really serves the interest of the public In *Hooked Ethics the Medical Profession and the Pharmaceutical Industry* Howard Brody claims that we can neither understand the problem nor propose helpful solutions until we fully recognize the many levels of activity that connect these two industries Then for real improvement to occur the doctors themselves need to not only change their behavior but also change how they view the actions of their peers and colleagues We can pass laws and enact regulations so that those physicians that do choose to focus on ethics won t be in an environment where they feel as if they are swimming against too strong a current to make meaningful change but ultimately a profession has to take responsibility for its own integrity
