A prominent multi-lane highway with overpasses is visible on the left side. A red location pin is placed on a street in the middle of the city, with a red label above it that reads "Brock Meyer".

Wind Between The Stars:

The Wind Between the Stars Margaret Mahy, 2010 Phoebe's granny once told her that the wind could blow between the stars When she was an old lady Phoebe remembered how to dance with the wind *Chemistry Between the Stars* Richard H. Gammon, 1976 **Instability and Variability of Hot-Star Winds** Anthony F.J. Moffat, Stanley P. Owocki, Alex W. Fullerton, Nicole St-Louis, 2012-12-06 This specialized workshop was conceived during the workshop on Non isotropic and Variable Outflows from Stars which was held at the Space Telescope Science Institute in October 1991 At that meeting the four of us collectively decided that the time was ripe for an even more focussed discussion of the basic issues in the area of hot star wind instability and its observable manifestations Not that the big problems have been solved Rather we are currently in a phase of rapid development both with regard to the models and to the observations The key issue at this new workshop would be to decide how the time dependent structures observed in hot star winds e.g. NACs DACs blobs clumps filaments shells puffs jets etc relate to radiative and other instabilities Further questions concern the role of turbulence and the nature of its driver and the effect of stellar rotation pulsation and magnetic fields on time dependent phenomena in hot star winds Of no less importance is the impact of stellar wind variability on the derivation of mass loss rates on stellar evolution and on momentum energy deposition in the interstellar medium To attain our goal of maximum confrontation in the positive sense we decided 1 to limit the workshop to the observers and theoreticians most active in this field in the world 2 to insist that virtually all participants present a talk thereby avoiding the distraction of poster sessions and 3 to allocate approximately half of the allotted time to discussion *The Interplay Between Massive Star Formation, the ISM and Galaxy Evolution* D.
