**Unified Field Theories** Vladimir P. Vizgin, 2011-06-24 Despite the rapidly expanding ambit of physical research and the continual appearance of new branches of physics the main thrust in its development was and is the attempt at a theoretical synthesis of the entire body of physical knowledge The main triumphs in physical science were as a rule associated with the various phases of this synthesis The most radical expression of this tendency is the program of construction of a unified physical theory After Maxwellian electrodynamics had unified the phenomena of electricity magnetism and optics in a single theoretical scheme on the basis of the concept of the electromagnetic field the hope arose that the field concept would become the precise foundation of a new unified theory of the physical world The limitations of an electromagnetic field conception of physics however already had become clear in the first decade of the 20th century The concept of a classical field was developed significantly in the general theory of relativity which arose in the elaboration of a relativistic theory of gravitation It was found that the gravitational field possesses in addition to the properties inherent in the electromagnetic field the important feature that it expresses the metric structure of the space time continuum This resulted in the following generalization of the program of a field synthesis of physics The unified field representing gravitation and electromagnetism must also describe the geometry of space time Highlights of the Grand Unified Theorem G. A. Oyibo, 2001

**Einstein's Theory of Unified Fields** Marie Antoinette Tonnelat, 2014-07-17 First published in 1966 here is presented a comprehensive overview of one of the most elusive scientific speculations by the pre eminent genius of the 20th century The theory is viewed by some scientists with deep suspicion by others with optimism but all agree that it represents an extreme challenge As the author herself affirms this work is not intended to be a complete treatise or didactic exposition of the theory of unified fields but rather a tool for further study both by students and professional physicists Dealing with all the major areas of research which together comprise the development of a working model the author ranges over conservation equations variational principles solutions of spherical symmetry and treats a wide selection of Einstein's own equations The final chapter indicates problems associated with the unified field theory in particular the energy momentum tensor and geodesics

**The Ontogenesis of Evolution** Peter Belohlavek, 2011-07 These books were written as consultation books to be used to solve problems They are essentially analogous to medical books for individuals who decided to manage the concepts and fundamentals of things in order to manage the root causes of problems The unicist ontology of evolution explains and predicts the evolution of living beings their produces and their actions in a unified field ruled by concepts and their natural laws These natural laws have been named as Ontogenetic Intelligence This evolutionary approach enables the analysis of and influence upon complex realities Human Physiology: Expression of Veda and the Vedic Literature Tony Nader, 2025-02-08 A Textbook of Life for Everyone Modern Science and Ancient Vedic Science Discover the Fabrics of Immortality in the Human Physiology Magnificent in scope this groundbreaking work details the relationship between the 40 branches of the

Vedic Literature and their corresponding parts in the human physiology Our physiology is continuously performing millions of tasks to maintain order and balance in its functioning to allow growth and evolution to occur and to bring about increasing achievement and fulfillment The perfect order displayed in the human physiology and throughout the universe is based on Laws of Nature that have been studied by modern science for more than 150 years The profound insights into the ancient Vedic Literature brought to light by Maharishi Mahesh Yogi over the past forty years have guided the discovery that the laws that construct the human mind and body are the same as those that give structure to the syllables verses chapters and books of the Vedic Literature This discovery has rendered the study of physiology to be the actualization of the supreme philosophy of life which establishes individual consciousness and national consciousness on the level of Cosmic Life Standard Space-Time Theory Shusheng Tan,Jianhua Li,Ganquan Xie,2025-12-06 Natural scattering is visible by light with positive frequency No natural scattering is invisible by light with positive frequency Visible natural sciences and invisible social and ideological sciences are called ordinary sciences Invisible natural sciences and visible social and ideological sciences are novel super sciences Main Contents include 1 Positive Space and Negative Space and Invisible Science 2 Isotropic electromagnetic invisible GLHUA sphere 3 Anisotropic electromagnetic invisible GLHUA cloak etc 12 chapters Standard Space time theory is one new theory of Super Science Einstein was a great genius His special theory of relativity has become one of the two main foundations of modern physics The special theory of relativity fully reveals the relativity of the motion of matter which is not revealed by Newtonian s Mechanics that is the dependence of the space time property of matter on the motion of matter It explained many experimental facts that could not be explained by classical physics and included the knowledge that physics has actually reached at the turn of the 19th and 20th centuries in his theoretical system and its understanding so it has opened up the way for physics research Einstein s work has done outstanding contributions to help shape the world in which we live today In 1999 the American weekly Time named him The Great Man of the Century Einstein became the symbol of the highest human wisdom of the 20th century Nevertheless science always moves forward and never stays at the same level In the last half century especially in the past 30 years theoretical thinking and experimental tests have revealed the difficulties and challenges of the special theory of relativity Bohm He was an acknowledged world authority on quantum mechanics said I don t think anybody can necessarily expect everything to turn out the way he expects it Quite a few things turned out that way for Einstein but he can t have everything right 1 The discovery of cosmic background radiation confirms the existence of the absolute inertial reference frame An experimental test of Bell s inequality found that Einstein was wrong There is no doubt that there is a superluminal causal connection or influence between two entangled particles It can be asserted that the non locality must be an important feature of the microcosm This opens up the way for the gestation development and establishment of the new theory *Unified Field Theory in a Nutshell1: The Quest for the Theory of Everything* Balungi Francis,2020-05-11 The first successful field theory was created by the Scottish Physicist James Clerk

Maxwell in the mid 19th century the electromagnetic field theory Then in the early 1900s Einstein spent 30yrs of his life developing a unified field theory but all in vain One limitation with Einstein s work was at first his rejection and then his ignorance of quantum theory Einstein was motivated by an intellectual need to unify the forces of nature He felt very strongly that all of nature must be described by a simple force field theory from which all other forces can be deduced In principle if one had the formula of a Unified field theory at hand it would be possible to derive every other natural law from them including all the laws of physics chemistry even molecular biology Without the use of the mathematics of the standard model and the notions of Einstein s general relativity theory we postulate a single force field equation from which all other physics laws are derived

**Transcendental Meditation** Robert Roth,2023-11-21 A Harvard graduate student asked his instructor Ronald David M D about meditation What was it What did it do Dr David Lecturer in Public Policy at the John F Kennedy School of Government offered to find out He called the Transcendental Meditation Center in Cambridge and the next week a speaker addressed Dr David s class Fascinated six students along with Dr David started the technique

*Ramayan in Human Physiology: Discovery of the Eternal Reality of the Ramayan in the Structure and Function of Human Physiology* Tony Nader,2025-02-08 More than ten years in the making the Ramayan in Human Physiology is the perfect sequel to Professor Tony Nader MD Ph D MARR s first groundbreaking work on the correspondence of the Vedic Literature and human physiology With his intellect finely honed by doctoral and post doctoral research in neuroscience at Massachusetts Institute of Technology MIT and Harvard Medical School and his intuition and feeling deeply cultivated by years of personal training with renowned Vedic scientist and sage Maharishi Mahesh Yogi Dr Nader beautifully integrates cutting edge science with the ancient wisdom of the Vedas Dr Nader s insights into the deepest levels of understanding of the cosmic nature of the human physiology led Maharishi to refer to him as the greatest scientist of our time and give him the honorary title of Maharaja Adhiraj Rajaraam

**The Un-Unified Field** Miles Mathis,2010 This book is the first collection of science papers by Miles Mathis Its topics include various problems in physics and math beginning with the famous Unified Field problem of Einstein and string theory These problems are solved with a simplified math and clear explanations Other problems addressed include Bode s Law the recent Saturn Anomaly Quantum Chromodynamics the ellipse and Goldbach s Conjecture

**UNIFIED FIELD THEORY: Extreme Physics** John Hildreth Atkins,2006-09-01 Atkins set out to prove that Einstein was wrong What he ended up doing was showing that Isaac Newton was wrong too Wrong because the force of attraction does not exist Science has been in a boondoggle of misdirection Atkins is going to turn Physics as we know it on its collective ear by defining gravity showing that the Ether exists redefining black holes showing that the speed of light is nearly infinite redefining how the solar system works and much much more This is science fact not science fiction WOW
