Vetiver Grass:

Vetiver Grass John C. Greenfield, 2002 Vetiver Grass National Research Council, Policy and Global Affairs, Board on Science and Technology for International Development, Panel on Vetiver, 1993-02-01 For developing nations soil erosion is among the most chronic environmental and economic burdens Vast amounts of topsoil are washed or blown away from arable land only to accumulate in rivers reservoirs harbors and estuaries thereby creating a double disaster a vital resource disappears from where it is desperately needed and is deposited where it is equally unwanted Despite much rhetoric and effort little has been done to overcome this problem Vetiver a little known tropical grass offers one practical and inexpensive way to control erosion on a huge scale in both humid and semi arid regions Hedges of this deeply rooted species catch and hold back sediments while the stiff foliage acts as a filter that also slows runoff and keeps moisture on site This book assesses vetiver s promise and limitations and identifies places where this grass can be deployed without undue environmental risk

Vetiver Grass John C. Greenfield, 1990 This handbook has been prepared to support fieldworkers and farmers in developing vegetative systems of soil and moisture conservation that will meet the requirements of small farmers in developing countries most of whom reside in the tropics and semitropics Experience has shown that conventional systems of earth bunds or terraces on small farms are expensive and in many cases especially in modern times ineffective When applied correctly vegetative systems of soil and moisture conservation particularly the system of hedges of vetiver grass described in this handbook have proved cheaper and more effective Vetiveria Massimo Maffei, 2002-01-17 Vetiveria is one of the most versatile genera in plant kingdom For example the species Vetiveria zizanioides produces odoriferous roots from which a precious essential oil is distilled and used in a variety of applications from perfumery to ethnopharmacology The same roots give the plant particular characteristics that make it a valuable natural barrier **Vetiver Grass for Soil and Water**

Conservation, Land Rehabilitation, and Embankment Stabilization Vetiver Network, 1995 Vetiver grass the ideal plant for vegetative soil and moisture conservation Vetiver grass the hedge against erosion The role of vetiver grass in sustaining agricultural productivity Grasses Amjad Almusaed, Sammera Mohamed Salih Al-Samarraee, 2017-09-06 This book has been prepared to embody the major and efficient applications of the different duties and roles of grasses in our life as well as

offered a solid concept for this kind of science The book aims to illustrate various ideas methods and how it is treated in the agronomic process for different forms of grasses in human life *Eco- and Ground Bio-Engineering: The Use of Vegetation to Improve Slope Stability* A. Stokes, Ioannis Spanos, Joanne E. Norris, Erik Cammeraat, 2007-04-10 This volume brings together papers from geotechnical and civil engineers biologists ecologists and foresters They discuss current problems in slope stability research and how to address them using ground bio and eco engineering techniques Coverage presents studies by scientists and practitioners on slope instability erosion soil hydrology mountain ecology land use and restoration and how to mitigate these problems using vegetation **The Overstory Book** Craig R. Salinity and Water Stress M. Ashraf, M. Ozturk, Habib-ur-Rehman Athar, 2008-12-26

Salinity and water stress limit crop productivity worldwide and generate substantial economic losses each year yet innovative research on crop and natural resource management can reveal cost effective ways in which farmers can increase both their productivity and their income Presenting recent research findings on salt stress water stress and stress adapted plants this book offers insights into new strategies for increasing the efficiency of crops under stressful environments The strategies are based on conventional breeding and advanced molecular techniques used by plant physiologists and are discussed using specific case studies to illustrate their potential The book emphasizes the effects of environmental factors on specific stages of plant development and discusses the role of plant growth regulators nutrients osmoprotectants and antioxidants in counteracting their adverse affects Synthesising updated information on mechanisms of stress tolerance at cell tissue and whole plant level this book provides a useful reference text for post graduate students and researchers involved in the fields of stress physiology and plant physiology in general with additional readership amongst researchers in horticulture agronomy crop science conservation environmental management and ecological restoration

Biomass for Environmental Remediation Yasser Vasseghian, 2025-03-29 Biomass for Environmental Remediation explores the pivotal role of biomass in revolutionizing environmental remediation From wastewater treatment to air pollution control and soil remediation this book delves into the myriad applications of biomass including the synthesis of advanced nanomaterials for sustainable solutions Users will find the latest advancements in harnessing organic resources for a cleaner and greener future while also uncovering the diverse sources of biomass and the innovative techniques transforming them into powerful tools for environmental restoration With insightful chapters on phytoremediation microbial applications and the production of biomass

derived nanomaterials this book serves as a vital guide for professionals researchers and students at the forefront of environmental sustainability Covers the entire biomass lifecycle allowing readers to gain a holistic understanding of how biomass can be seamlessly integrated into environmental projects Includes real world case studies that provide readers with practical insights into successful biomass applications Explores the synthesis of advanced nanomaterials from biomass and their applications in environmental remediation
