Sample Book Insights 1 The telegraph a system of sending messages or information to a distant place was invented in 1746 It was a big deal because it suggested that it should be possible to harness electricity to build a signaling device that could send messages over great distances incomparably faster than a human messenger could carry them 2 In 1617 Famianus Strada a learned Italian wrote a book explaining how two needles could be touched with a lodestone and then balanced on separate pivots and the one turned in a particular direction would cause the other to sympathetically move parallel to it 3 The story of the magic needles was based on a germ of truth there are naturally occurring minerals called lodestones that can be used to magnetize needles and other metallic objects However these did not exist in the form described by Strada 4 Chappe s telegraph was a series of wooden panels that could be flipped from black to white as the second hand passed over a particular number The messages were sent over very great distances very quickly and a telescope was used to observe the panels

the groundwork for sober minded opportunities growth and innovation Could it be that bubbles wind up being a competitive advantage for the bubble prone U S economy In this entertaining and fast paced book you ll laugh as much as you cry Daniel Gross convincingly argues that every bubble has a golden lining From the 19th century mania for the telegraph to the current craze in alternative energy from railroads to real estate Gross takes us on a whirlwind tour of reckless investors and pie in the sky promoters detailing the mania they created but also the lasting good they left behind In one of the great ironies of history Gross shows how the bubbles once generally seen as disastrous have actually helped build the commercial infrastructures that have jump started American growth If there is a secret to the perennial resilience and exuberance of the American economy Gross may just have found it in our peculiar capacity to blow financial bubbles and successfully clean up the mess
