William Lescaze:

William Lescaze, Architect Lorraine Welling Lanmon, 1987 **William Lescaze** Christian Hubert, Lindsay Stamm Shapiro, Joe and Emily Lowe Art Gallery (Syracuse University), 1982 **Europe Meets America** Gaia Caramellino, 2016-08-17 An analysis of the New York professional milieu between the Wall Street Crash of 1929 and the aftermath of WWII reveals an unexpected scenario in which diverse branches of technical culture and professional and institutional spheres often overlap and initiatives in the field of architecture are characterised by tensions between designers and technicians which pave the way for issues of architects autonomy responsibility and social roles in the New Deal From an initial portrayal of William Lescaze 1896 1969 as an unconventional figure straddling two continents this book challenges a long established interpretation that sees Lescaze exclusively as promoter of the International Style canons in the United States Moving beyond it this book focuses on the role that the Swiss architect played in defining the main features of New York social housing and in the evolution that marks the encounter between European modernity and an American federal scene still profoundly tied to local conventions From an initially difficult status as an migr to his involvement in decisional processes and bureaucratic organisations Lescaze s professional progress coincides with the gradual acceptance of European forms and models which little by little became part of the institutional language related to public housing which would remain prevalent in New York City until the end of WWII Drawing from yet unpublished archival sources pertaining to two fields housing and architecture which have traditionally been separate in American historiography this book sheds light on many crucial issues in a branch of architecture that is particularly relevant today **William Lescaze** William Lescaze, Christian Hubert, 1993 *A Selection from the Work Designed by William Lescaze, Architect, New York City* William Lescaze, 1942 **Encyclopedia of Twentieth Century Architecture** R. Stephen Sennott, 2004 For more information including the introduction a full list of entries and contributors a generous selection of sample pages and more visit the Encyclopedic of 20th Century Architecture website Focusing on architecture from all regions of the world this three volume set profiles the twentieth century s vast chronicle of architectural achievements both within and well beyond the theoretical confines of modernism Unlike existing works this encyclopedia examines the complexities of rapidly changing global conditions that have dispersed modern architectural types movements styles and building practices across traditional geographic and cultural boundaries *Design History* Dennis P. Doordan, 1996-03-06 his anthology compiled from volumes 3 10 of *Design Issues* includes material from areas seldom discussed in existing surveys and will facilitate the general discourse within the design community on a wide range of conceptual and methodological issues of contemporary design history Design history has emerged in recent years as a significant field of scholarly research and critical reflection With their interest in the conceptualization production and consumption of objects large and small unique or multiple anonymous or signed and environments ephemeral or enduring public or private design historians investigate the multiple ways in which

intentionally produced objects environments and experiences both shape and reflect their historical moments This anthology compiled from volumes 3 10 of Design Issues includes material from areas seldom discussed in existing surveys and will facilitate the general discourse within the design community on a wide range of conceptual and methodological issues of contemporary design history Individual essays investigate various aspects of design in the modern era They provide fresh insights on familiar figures such as Harley Earl and Norman Bel Geddes and shed new light on neglected aspects of design history such as the history of women in early American graphic design or the history of modern design in China The essays are grouped in three broad categories Graphic Design Design in the American Corporate Milieu and Design in the Context of National Experiences Contributors David Brett Bradford R Collins Dennis P Doordan David Gartman Gyorgy Haiman Larry D Luchmansingh Roland Marchand Enric Satu Mitchell Schwarzer Paul Shaw Svetlana Sylvestrova Ellen Mazur Thomson Matthew Turner John Turpin Shou Zhi Wang A Design Issues Reader

Air-Conditioning in Modern American Architecture, 1890-1970 Joseph M. Siry, 2021-02-01 Air Conditioning in Modern American Architecture 1890 1970 documents how architects made environmental technologies into resources that helped shape their spatial and formal aesthetic In doing so it sheds important new light on the ways in which mechanical engineering has been assimilated into the culture of architecture as one facet of its broader modernist project Tracing the development and architectural integration of air conditioning from its origins in the late nineteenth century to the advent of the environmental movement in the early 1970s Joseph M Siry shows how the incorporation of mechanical systems into modernism s discourse of functionality profoundly shaped the work of some of the movement s leading architects such as Dankmar Adler Louis Sullivan Frank Lloyd Wright Ludwig Mies van der Rohe Gordon Bunshaft and Louis Kahn For them the modernist ideal of functionality was incompletely realized if it did not wholly assimilate heating cooling ventilating and artificial lighting Bridging the history of technology and the history of architecture Siry discusses air conditioning s technical and social history and provides case studies of buildings by the master architects who brought this technology into the conceptual and formal project of modernism A monumental work by a renowned expert in American modernist architecture this book asks us to see canonical modernist buildings through a mechanical engineering oriented lens It will be especially valuable to scholars and students of architecture modernism the history of technology and American history

Building Character Charles L. Davis II, 2019-09-06 In the nineteenth century paradigm of architectural organicism the notion that buildings possessed character provided architects with a lens for relating the buildings they designed to the populations they served Advances in scientific race theory enabled designers to think of race and style as manifestations of natural law just as biological processes seemed to inherently regulate the racial characters that made humans a perfect fit for their geographical contexts architectural characters became a rational product of design Parallels

between racial and architectural characters provided a rationalist model of design that fashioned some of the most influential national building styles of the past from the pioneering concepts of French structural rationalism and German tectonic theory to the nationalist associations of the Chicago Style the Prairie Style and the International Style In Building Character Charles Davis traces the racial charge of the architectural writings of five modern theorists Eugene Emmanuel Viollet le Duc Gottfried Semper Louis Sullivan Frank Lloyd Wright and William Lescaze to highlight the social political and historical significance of the spatial structural and ornamental elements of modern architectural styles **The Museum** ,1928

Presidential Temples Benjamin Hufbauer,2005 This book explores the visual and material cultures of presidential commemoration memorials and monuments libraries and archives and the problematic ways in which presidents themselves have largely taken over their own commemoration The author sees these various commemorative sites as playing a key role in the construction of our collective political and cultural self images and as another sign of our preoccupation with celebrity culture Ultimately he contends these presidential temples reflect not only our civil religion but also the extraordinary expansion of executive authority and presidential self commemoration since FDR **Town & Country** ,1929 **New Pencil Points** Eugene Clute,Russell Fenimore Whitehead,Kenneth Reid,Elizabeth L.
