John and Elizabeth Gould sailed into Australia on a cold spring day in 1838, prepared for the most astonishing adventure of their lives. They had crossed three oceans from their London home to find the treasures of Australia's birdlife and showcase them to the outside world. Elizabeth had fallen pregnant for the seventh time at just 34, and there would be little rest for her in illustrating her husband's exquisite books that had made him England's celebrated Bird Man and a force of nature in both science and publishing. Elizabeth had always worked in his shadow, but perhaps with his new book *The Birds of Australia*, she would finally receive the deserved acclaim for her work. Gould had studied birds from the Galapagos Islands and helped Charles Darwin expound his controversial theory of evolution by natural
