Window On A War:

Window on a war ,2002 *Causes of War* Stephen Van Evera,2013-01-15 What causes war How can military conflicts best be prevented In this book Stephen Van Evera frames five conditions that increase the risk of interstate war false optimism about the likely outcome of a war a first strike advantage fluctuation in the relative power of states circumstances that allow nations to parlay one conquest into another and circumstances that make conquest easy According to Van Evera all but one of these conditions false optimism rarely occur today but policymakers often erroneously believe in their existence He argues that these misperceptions are responsible for many modern wars and explores both World Wars the Korean War and the 1967 Mideast War as test cases Finally he assesses the possibility of nuclear war by applying all five hypotheses to its potential onset Van Evera s book demonstrates that ideas from the Realist paradigm can offer strong explanations for international conflict and valuable prescriptions for its control

Cole,Joff P.N. Bradley,2016-07-23 A Pedagogy of Cinema is the first book to apply Deleuze s concept of cinema to the pedagogic context Cinema is opened up by this action from the straightforward educative analysis of film to the systematic unfolding of image A Pedagogy of Cinema explores what it means to engender cinema thinking from image This book does not overlay images from films with an educational approach to them but looks to the images themselves to produce philosophy This approach to utilising image in education is wholly new and has the potential to transform classroom practice with respect to teaching and learning about cinema The authors have carefully chosen specific examples of images to illustrate such transformational processes and have fitted them into in depth analysis that is derived from the images The result is a combination of image and text that advances the field of cinema study for and in education with a philosophical intent This outstanding new book asks a vital question for our time How can we educate effectively in a digitalized corporatized Orwellian surveillance controlled globalized world This question is equally a challenge asked of our ability to think outside of the limiting parameters of the control society and the forces which daily propel us ever quicker towards worldwide homogenization With great lucidity Cole and Bradley offer us profound hope in Gilles Deleuze s increasingly popular notion of cine thinking They explore and explain the potential that this sophisticated idea holds for learning in an

easy going and accessible way and with a range of fantastic films from *Suspiria* and *Performance* through to *Under the Skin* and *Snowpiercer* This extremely engaging and compelling text is likely to enliven scholars and students everywhere David Martin Jones Film and Television Studies University of Glasgow UK *The Illustrated War News* ,1918

Computer-Supported Cooperative Work Uwe M. Borghoff, Johann H. Schlichter, 2013-11-09 The terms groupware and CSCW computer supported cooperative work have received significant attention in computer science and related disciplines for quite some time now This book is a revised and extended version of the 2nd edition of the German textbook *Rechnergestützte Gruppenarbeit Eine Einführung in verteilte Anwendungen* It has two main objectives first to outline the meaning of both terms and second to point out both the numerous opportunities for users of groupware and the risks of applying such systems The book intends to introduce an area of distributed systems namely the computer support of individuals trying to solve a common problem in cooperation with each other but not necessarily having identical work paces or working times Computer supported cooperative work is an interdisciplinary application domain It can be viewed as a synergism between the areas of distributed systems and multimedia communication on the one hand and between those of information science and socio organizational theory on the other hand Thus the book is meant to help students of all these disciplines as well as users and developers of systems which have communication and cooperation within groups as top priorities **Katherine Somerville, Or, The Southland Before and After the Civil War** Annie Somers Gilchrist, 1906
