Spectacles And Sunglables:

Official Gazette of the United States Patent and Trademark Office, 2006 *Making a Spectacle* Jessica Glasscock, 2021-10-26 From 13th century Franciscan monks to Beyoncé in *Black is King* *Making a Spectacle* charts the fascinating ascension of eyeglasses from an unsightly but useful tool to fashion's must-have accessory. The power of glasses to convey a range of vivid messages about their wearers has made them into a billion-dollar business that appeals to cool kids and rock stars and those who want to be like them, but the fashionable history of eyeglasses is fraught with anxiety and drama. At the beginning of the 20th century, the assessment in *Vogue* and *Harper's Bazaar* was that spectacles were invariably disfiguring. Invisibility was the best option, and glasses were only to be put on once the lights at the opera went dark. While variations of that glasses-shaming sentiment appeared at regular intervals over the next 100 years or so, eyeglasses continued to evolve into an endless array of shapes, colors, purposes, and personalities. Once sunglasses took off in the 1930s, the magazine editorial made glasses a conspicuous part of the fashion narrative. Eyeglasses went to the ski slopes, the stables, the beach, the Havana hotel. Plastic innovations made a candy-colored rainbow of cat eyes and starlet styles possible. Suddenly, everyone had the opportunity to look like Jackie O on vacation in Capri. *Making a Spectacle* traces contemporary high-fashion frames back to their origins: the military aviator, the glam cat eye, the nerdy Oxford, the high-tech shield, the fanciful butterfly, the lowly rimless, and other styles. All make an appearance. Featuring interviews with influential designers, makers, and purveyors of glasses, including Adam Selman, Kerin Rose Gold, and I.A. Eyeworks, *Making a Spectacle* also takes a look at today's most cutting-edge eyewear, showing the reader the latest and most innovative ways to see and be seen.

Cult Eyewear Neil Handley, 2011 Selecting a pair of glasses can be a tricky business. With so many styles and labels available, the choice is as much about making a fashion statement as gaining perfect vision. *Cult Eyewear* is the first book to give an account of the world's top eyewear brands, from Ray-Ban to J.F. Rey Persol to Polaroid, and from the 1780s to the present day. Neil Handley, an authority on the history of eyewear, selects more than 30 famous names that have enduring appeal and command a dedicated following, and discusses the history of each brand and its most iconic spectacles or sunglasses. The book also includes a concise, illustrated introduction to the evolution of eyewear, innovative designs, and historically important inventions, films, and key personalities associated with particular designs or brands through the years, and other fascinating aspects of this global industry.

In the Blink of an Eye Stefana Sabin, 2021-08-12 From monocles to pince-nez and goggle eyes, a cultural and technological history of glasses in fact and fiction. This book examines those who wore glasses through history, art, and literature, from the green emerald through which Emperor Nero watched gladiator fights to Benjamin Franklin's homemade bifocals, and from Marilyn Monroe's cat-eye glasses to the famed four eyes of Emma Bovary and Harry Potter. Spectacles are objects that seem commonplace, but *In the Blink of an Eye* shows that because they fundamentally changed people's lives, glasses were the wellspring of a quiet social, cultural, and economic revolution. Indeed,

one can argue that modernity itself began with the paradigm shift that transformed poor eyesight from a severely limiting disease treated with pomades and tinctures into a minor impairment that can be remedied with mechanisms constructed from lenses and wire

Vision Aids in America Kerry Segrave,2014-01-10 This text examines the eyewear industry in America from 1900 to 2008 a period which mirrors an increased demand for eyewear Eyeglasses sunglasses and contacts are discussed Topics covered include the marketing and selling of eyewear with particular attention paid to advertising strategies and the internal structures of the industry and its regulations which have sometimes helped and sometimes hurt consumers This critical examination reveals how a relatively simple and functional item such as corrective eyewear could be transformed through marketing into a fashion accessory and a personal statement

Eyeglass Retrospective Nancy Schiffer,2000 Examples of eyewear from the seventeenth century to the present are shown in over 600 color photos and explained in an engaging text This book provides an overview for identifying and dating vintage eyewear for the growing numbers of collectors Explore ways in which eyeglass design has developed to reflect both popular fashion and scientific investigation The designs of frames and lenses were changed as more comfortable and practical styles were invented In the mid twentieth century eyeglass makers carefully sought high profile entertainers to wear their designs in order to promote their companies Advertising worked its magic and the general public came to prefer the advertised designs Examples of eyewear from the seventeenth century to the present are shown in over 600 color photos and explained in an engaging text Bifocals monacles pince nez fanciful and safety styles of eyeglasses and sunglasses are shown along with some price estimates

Applications is a complementary and thoughtful but selected compilation of the most relevant information concerning protective helmets as well as eye and face protection. The compilation of these two protection types is the result of the common use of both protective helmets and eye and face protectors. This requires their full compatibility both in terms of ensuring optimum safety and comfort of use. The authors have chosen the material according to the needs of people directly responsible for safety at work and users of those protectors. The main aim of the work is to popularise knowledge in the field of construction research methods, selection and use of protective helmets and eye and face protectors. In terms of use, the authors emphasise the necessity of independent control, i.e. checking the technical condition of the equipment used by the end users. The presented monograph includes the current state of knowledge in this scope, extended by the results and summaries of the authors' own research. All requirements and research methods are given based on European EN international ISO standards and standards operating in different geographical areas. The monograph also encompasses new trends in the design of protective helmets and eye and face protectors. All this allows me to emphasize the uniqueness of this monograph in relation to previous publications in this field, both in terms of the scope and selection of information concerning protective helmets and eye and face protectors.
