## **Understandable Statistics Text With Statpass:**

**Understandable Statistics** Charles Henry Brase, Corrinne Pellillo Brase, 2002-05-01 *Understandable Statistics* is a thorough yet manageable text for one semester introductory statistics courses. The text's approachable style is designed to help students overcome their apprehension about statistics. To reinforce this approach, the book integrates graphing technology as well as real life data from such sources as journals, periodicals, newspapers, and the Internet. This real world emphasis asks students to utilize real data to draw conclusions and interpret results working on problems drawn from the sciences, business, medicine, archaeology, and consumer economics. Check Points at the beginning of each section list the concepts that will be covered in the section to prepare students for the material. Tech Notes found in select sections provide general tips to guide students in the appropriate use of the TI 83 Plus, Minitab, and Excel. Denoted by an icon, the Tech Notes also incorporate display screens from each of these technologies to help students work through a statistical problem and better understand the solution. Eduspace is Houghton Mifflin's online learning tool. Powered by Blackboard, Eduspace is a customizable, powerful, and interactive platform that provides instructors with text-specific online courses and content. The Brase statistics course features algorithmic exercises and test bank content in question pools.
