**How We Work** Leah Weiss, PhD, 2018-03-13 I have long thought that what the Buddha taught can be seen as a highly developed science of mind which if made more accessible to a lay audience could benefit many people I believe that Dr Weiss's book in combining such insights with science and good business practice offers an effective mindfulness based program that many will find helpful His Holiness the Dalai Lama A practical guide to bringing our whole selves to our professional work based on the author's overwhelmingly popular course at the Stanford Graduate School of Business In today's workplace the traditional boundaries between work and personal are neither realistic nor relevant From millennials seeking employment in the sharing economy to Gen Xers telecommuting to Baby Boomers creating a meaningful second act the line that separates who we are from the work we do is blurrier than ever The truth is we don't show up for our jobs as a portion of ourselves by necessity we bring both our hearts and our minds to

everything we do In *How We Work* mindfulness expert and creator of the perennially waitlisted Stanford Business School course *Leading with Mindfulness and Compassion* Dr Leah Weiss explains why this false dichotomy can be destructive to both our mental health and our professional success The bad news says Weiss is that nothing provides more opportunities for negative emotions anxiety anger envy fear and paranoia to name a few than the dynamics of the workplace But the good news is that these feelings matter How we feel at and about work matters to ourselves to the quality of our work and ultimately to the success of the organizations for which we work The path to productivity and success says Weiss is not to change jobs to compartmentalize our feelings or to create a false professional identity but rather to listen to the wisdom our feelings offer Using mindfulness techniques we can learn how to attend to difficult feelings without becoming subsumed by them we can develop an awareness of our bigger picture goals that orients us and allows us to see purpose in even the most menial tasks In *How We Work* Weiss offers a set of practical evidence based strategies for practicing mindfulness in the real world showing readers not just how to survive another day but how to use ancient wisdom traditions to sharpen their abilities enhance their leadership and interpersonal skills and improve their satisfaction
