Mathematical Programming T. C. Hu, Stephen M. Robinson, 2014-05-10 Mathematical Programming provides information pertinent to the developments in mathematical programming This book covers a variety of topics including integer programming dynamic programming game theory nonlinear programming and combinatorial equivalence Organized into nine chapters this book begins with an overview of optimization of very large scale planning problems that can be achieved on significant problems This text then introduces non stationary policies and determines certain operating characteristics of the optimal policy for a very long planning horizon Other chapters consider the perfect graph theorem by defining some well known integer valued functions of an arbitrary graph This book discusses as well integer programming that deals with the class of mathematical programming problems in which some or all of the variables are required to be integers The final chapter deals with the basic theorem of game theory This book is a valuable resource for readers who are interested in mathematical programming Mathematicians will also find this book useful Mathematical Programming Gur Huberman, 1981 *Mathematical Programming* S. M. Sinha, 2005-01-01 Mathematical Programming a branch of Operations Research is perhaps the most efficient technique in making optimal decisions It has a very wide application in the analysis of management problems in business and industry in economic studies in military problems and in many other fields of our present day activities In this keen competitive world the problems are getting more and more complicated and efforts are being made to deal with these challenging problems This book presents from the origin to the recent developments in mathematical programming The book has wide coverage and is self contained It is suitable both as a text and as a reference A wide ranging all encompassing overview of mathematical programming from its origins to recent developments A result of over thirty years of teaching experience in this field A self contained guide suitable both as a text and as a reference
