Psychology David G. Myers, 2007 *Theatre and Consciousness* Gordon Scott Armstrong, 2003 Human beings have speech we have consciousness but 130 000 years ago we had nothing why Theatre and Consciousness argues that the functioning of human consciousness in interpreting and staging a theatrical performance is among the most highly selective and adaptive operations known to science The emergence of the human mind out of discontinuous pulsing neuronal brain patterns is a study in complexity theory possibly as complicated as the organization of the universe According to this book the theatre as a substrate of consciousness is one element that defines modern man as a reflective species having evolved over 190 000 000 years The emergence of Homo Sapiens is unique and fundamentally unpredictable our developed speech is closer to birdsong than to any other species communication on earth we have survived five galactic beam splitters from space and our evolutionary discontinuous cortex has found a pattern to existence that may include up to twenty six folded dimensions of string theory space This book asserts that the story of theatre is the story of the evolution of our second generation star
