The ^AOxford Handbook of American Literary Realism Keith Newlin,2019-08-01 The Oxford Handbook of American Literary Realism offers fresh interpretations of the artistic and political challenges of representing life accurately It is the first book to treat the subject topically and thematically in wide scope with essays that draw upon recent scholarship in literary and cultural studies to offer an authoritative and in depth reassessment of major and minor figures and the contexts that shaped their work

Studies in Anglistics Gunnel Melchers,Beatrice Warren,1995 The aim of the book is to reflect linguistic research at a university department of English It is restricted to lexicology grammar and language contact The importance of corpus based studies in anglistics is evident in all sections but particularly so in the lexicology section which contains articles on corpus and discourse typology Apart from these the articles in this section range from studies of Old English words to teenagers swearwords in present day London Although a majority of the articles deal with pragmatic aspects of words there are also more traditional studies of word formation and figures of speech The grammar section deals with some grammatical problems of past and present English eg third person plural personal pronouns in Old English zero relatives and nuclear and peripheral clauses in modern English It also contains an article on the development of English grammar examples and one on the part of a model in foreign language learning The section devoted to language contact contains an article concerned with the influence of one English variety on another and three concerned with English influence on Norwegian and Swedish

Schools in Transition Pauli Siljander,Kimmo Kontio,Eetu Pikkarainen,2016-12-27 School is one of the most focal institutions in modern society It is largely through the institutionalized forms of education that modern society attempts to secure and maintain its social and economic well being and its valuable cultural life forms In addition to this school is the essential institution through which the future of a society is defined Thus at least when understood traditionally as a pedagogical institution the school stands at the center of historically and socially constructed cultural life forms and at the brink of an unknown future the determination of that future characterizes the pedagogical task of the school It naturally ensues then that modern discourses of the school have always been intertwined with the critical question of how past present and future can be linked in educational practices so that schools can foster in ever better ways the well being of individuals societies and humanity The chapters in this volume despite the variety of viewpoints share this critical view The purpose of the volume is not to offer definite answers rather it is to stress that to understand the role and functions of school in contemporary society and to orientate its transition a well founded critical evaluation of prevailing pedagogical practices and policy trends is required This evaluation is vital for the future of school and society
