Random Polynomials: A function of the form

$$P_n(x) = \sum_{j=0}^{n} a_j x^j,$$

with the a_j being real valued random variables is called a random polynomial.

In the case of real Gaussian coefficients, one of the essential works is due to Kac [1943], where he introduces an explicit integral formula to determine the expected number of the real zeros of P_n. He showed that if $a_j \sim \mathcal{N}(0,1)$ (all the coefficients are i.i.d. random variables with standard normal distribution), then for large enough $n \in \mathbb{N}$,

$$\mathbb{E}[N_n(\mathbb{R})] \sim \frac{2}{\pi} \ln(n).$$

Note that $N_n(\mathbb{R})$ denotes the number of **REAL** zeros of P_n.

   Topics in Random Polynomials K Farahmand,1998-08-15 Topics in Random Polynomials presents a rigorous and comprehensive treatment of the mathematical behavior of different types of random polynomials These polynomials the subject of extensive recent research have many applications in physics economics and statistics The main results are presented in such a fashion that they can be understood and used by readers whose knowledge of probability incorporates little more than basic probability theory and stochastic processes   *Topics in Random Polynomials* Kambiz Farahmand,1998   Random Polynomials A. T. Bharucha-Reid,M. Sambandham,2014-05-10 Probability and Mathematical Statistics A Series of Monographs and Textbooks Random Polynomials focuses on a comprehensive treatment of random algebraic orthogonal and trigonometric polynomials The publication first offers information on the basic definitions and properties of random algebraic polynomials and random matrices Discussions focus on Newton s formula for random algebraic polynomials random characteristic polynomials measurability of the zeros of a random algebraic polynomial and random power series and random algebraic polynomials The text then elaborates on the number and expected number of real zeros of random algebraic polynomials number and expected number of real zeros of other random polynomials and variance of the number of real zeros of random algebraic polynomials Topics include the expected number of real zeros of random orthogonal polynomials and the number and expected number of real zeros of trigonometric polynomials The book takes a look at convergence and limit theorems for random polynomials and distribution of the zeros of random algebraic polynomials including limit theorems for random algebraic polynomials and random companion matrices and distribution of the zeros of random algebraic polynomials The publication is a dependable reference for probabilists statisticians physicists engineers and economists   **Topics on Random Polynomials and Random Polytopes** Hauke Hendrik Seidel,2022

conference was to gather in a single meeting mathemati cians working in the many fields to which Smale has made lasting con tributions The theme Unity and Diversity is enlarged upon in the section entitled Research Themes and Conference Schedule The organizers hoped that illuminating connections between seemingly separate mathematical sub jects would emerge from the conference Since such connections are not easily made in formal mathematical papers the conference included discussions after each of the historical reviews of Smale s work in different fields In addition there was a final panel discussion at the end of the conference   **European Congress of Mathematics** Ari Laptev,2005 The European Congress of Mathematics held every four years has established itself as a major international mathematical event Following those in Paris 1992 Budapest 1996 and Barcelona 2000 the Fourth European Congress of Mathematics took place in Stockholm Sweden June 27 to July 2 2004 with 913 participants from 65 countries Apart from seven plenary and thirty three invited lectures there were six Science Lectures covering the most relevant aspects of mathematics in science and technology Moreover twelve projects of the EU Research Training Networks in Mathematics and Information Sciences as well as Programmes from the European Science Foundation in Physical and Engineering Sciences were presented Ten EMS Prizes were awarded to young European mathematicians who have made a particular contribution to the progress of mathematics Five of the prizewinners were independently chosen by the 4ECM Scientific Committee as plenary or invited speakers The other five prizewinners gave their lectures in parallel sessions Most of these contributions are now collected in this volume providing a permanent record of so much that is best in mathematics today   Communications in Applied Analysis ,2005
