Totalitarian Science and Technology Paul R. Josephson, 2005 No Marketing Blurb Totalitarian Science and Technology Paul R. Josephson, 1996 Based on a synthesis and reinterpretation of recent work this book presents a balanced view of science in totalitarian regimes by going beyond attacks on their pseudo science to investigate and understand how politics and culture shape science and technology **Marcuse's Challenge to Education** Douglas Kellner, Tyson Lewis, Clayton Pierce, Daniel K. Cho, 2009-01-16 Marcuse's Challenge to Education a collection of unpublished lecture notes by the thinker himself as well as essays by scholars who have explicated his theories examines Herbert Marcuse's groundbreaking critique of education as well as his own pedagogical alternatives Edited by Douglas Kellner this compilation provides an overview of the various themes of Marcuse's challenges to traditional education and connections with ideas of other radical thinkers ranging from Bloch and Freire to Freud and Lacan *Controlling Technology, Science, Technology and Society*, 1996 *Encyclopedia of Science, Technology, and Ethics* Carl Mitcham, 2005 This encyclopedia considers both the professional ethics of science and technology and the social ethical and political issues raised by science and technology **Secret Weapons and World War II** Walter E. Grunden, 2005 Grunden's analysis of this fundamental flaw in the Japanese war effort seamlessly weaves together science technology and military history to provide an entirely unique look at a crucial but understudied aspect of World War II Comparing the science and weapons programs of all the major combatants he demonstrates that Japan's failure was nearly inevitable given its paucity of strategic resources an inadequate industrial base the absence of effective centralized management to coordinate research military hostility toward civilian scientists and bitter interservice rivalries In the end Japan could not overcome these obstacles and thus failed to make the transition to the kind of Big Science it needed to ward off its enemies and dominate the Far East BOOK JACKET

Happened to Class? Rina Agarwala,Ronald J. Herring,2018-10-24 Class explains much in the differentiation of life chances
and political dynamics in South Asia scholarship from the region contributed much to class analysis Yet class has lost its
previous centrality as a way of understanding the world and how it changes This outcome is puzzling new configurations of
global economic forces and policy have widened gaps between classes and across sectors and regions altered people s
relations to production and produced new state citizen relations Does market triumphalism or increased salience of identity
politics render class irrelevant Has rapid growth in aggregate wealth obviated long standing questions of inequality and
poverty Explanations for what happened to class vary from intellectual fads to global transformations of interests The authors
ask what is lost in the move away from class and what South Asian experiences tell us about the limits of class analysis
Empirical chapters examine formal and informal sector labor social movements against genetic engineering and politics of
the new middle class A unifying analytical concern is specifying conditions under which interests of those disadvantaged by
