View From Nowhere:

The ^AView From Nowhere Thomas Nagel,1986-01-23 Human beings have the unique ability to view the world in a detached way but at the same time each of us is a particular person in a particular place each with his own personal view of the world Thomas Nagel s ambitious and lively book tackles this fundamental issue arguing that our divided nature is the root of a whole range of philosophical problems touching every aspect of human life He deals with its manifestations in such fields of philosophy as the mind body problem personal identity knowledge and skepticism thought and reality free will ethics the relation between moral and other values the meaning of life and death

The Cambridge Companion to Merleau-Ponty Taylor Carman,Mark B. N. Hansen,Mark Boris Nicola Hansen,2005 Publisher Description *Founding Mathematics on Semantic Conventions* Casper Storm Hansen,2021-11-04 This book presents a new nominalistic philosophy of mathematics semantic conventionalism Its central thesis is that mathematics should be founded on the human ability to create language and specifically the ability to institute conventions for the truth conditions of sentences This philosophical stance leads to an alternative way of practicing mathematics instead of building objects out of sets a mathematician should introduce new syntactical sentence types together with their truth conditions as he or she develops a theory Semantic conventionalism is justified first through criticism of Cantorian set theory intuitionism logicism and predicativism then on its own terms and finally exemplified by a detailed reconstruction of arithmetic and real analysis Also included is a simple solution to the liar paradox and the other paradoxes that have traditionally been recognized as semantic And since it is argued that mathematics is semantics this solution also applies to Russell s paradox and the other mathematical paradoxes of self reference In addition to philosophers who care about the metaphysics and epistemology of mathematics or the paradoxes of self reference this book should appeal to mathematicians interested in alternative approaches

[Loose Women](#),
[Lecherous Men](#) Linda LeMoncheck,1997-10-09 Linda LeMoncheck introduces a new way of thinking and talking about women s sexual pleasures preferences and desires Using the tools of contemporary analytic philosophy she discusses methods for mediating the tensions among apparently irreconcilable feminist perspectives on women s sexuality and shows how a feminist epistemology and ethic can advance the dialogue in women s sexuality across a broad political spectrum She argues that in order to capture the diversity and complexity of women s sexual experience women s sexuality must be examined from two equally compelling perspectives that of women s sexual oppression under conditions of individual and institutional male dominance and that of women s sexual liberation both in terms of each woman s pursuit of sexual agency and self definition and in terms of women s sexual liberation as a class Loose Women Lecherous Men sheds crucial new light on such much debated topics as promiscuity adultery sexual deviance prostitution pornography sexual harassment and sexual violence against women Her book supports a dialogue that encourages both women and men to take up a feminist perspective in exploring the meaning and value of sexuality in their lives

Social Contract Theory for a Diverse World Ryan Muldoon,2016-10-14 Very diverse societies pose real problems for Rawlsian models of public reason This is for two reasons first public reason is unable accommodate diverse perspectives in determining a regulative ideal Second regulative ideals are unable to respond to social change While models based on public reason focus on the justification of principles this book suggests that we need to orient our normative theories more toward discovery and experimentation The book develops a unique approach to social contract theory that focuses on diverse perspectives It offers a new moral stance that author Ryan Muldoon calls The View From Everywhere which allows for substantive fundamental moral disagreement This stance is used to develop a bargaining

model in which agents can cooperate despite seeing different perspectives Rather than arguing for an ideal contract or particular principles of justice Muldoon outlines a procedure for iterated revisions to the rules of a social contract It expands Mill s conception of experiments in living to help form a foundational principle for social contract theory By embracing this kind of experimentation we move away from a conception of justice as an end state and toward a conception of justice as a trajectory Listen to Robert Talisse interview Ryan Muldoon about Social Contract Theory for a Diverse World on the podcast New Books in Philosophy <http://tinyurl.com/j9oq324> Also read Ryan Muldoon s related Niskanen Center article Diversity and Disagreement are the Solution Not the Problem published Jan 10 2017 <https://niskanencenter.org/blog/diversity-disagreement-solution-not-problem> [The Subjectivity of the Mental](#) Jeremy W.
