The image shows a double-page spread of a time blocking planner template. Each page is titled "Time Blocking" and features a grid for scheduling. The grid is divided into four columns: "Date", "Time", "Event", and "Notes". The "Date" column is for the day of the week, "Time" for the hour, "Event" for the activity, and "Notes" for additional details. The template is designed for a spiral-bound notebook and includes a central binding area.

[An Incremental Non-linear Planner](#) Steve A. Chien, 1990 Abstract This paper describes a non linear planner that uses incremental inference to deal with complexity of planning using a representation with conditional effects This planner constructs initial plans using limited inference to reason about conditional effects of operators While this significantly reduces the computational expense of plan construction it introduces the possibility that the initial plan will make incorrect predictions Because the planner uses a sound method for plan construction sound except for the limited

consideration of effects when a plan fails it must be due to an unconsidered conditional operator effect
