The 5x questions checklist for an effective hybrid workplace model

01 What do people want?

As mentioned above, a successful hybrid work strategy and hybrid workplace model can only work if it's designed for the people.

Before making any significant decisions or investments, it's important to understand the preferences, needs, and expectations of the employees, IT staff, and the employees who will also need to manage it.

The way to build a hybrid work model is to first ask what people want for themselves, and then to build a model that meets those needs.

How do you know? About how you should design a successful hybrid workplace? There are several ways to find out. You can survey employees, conduct focus groups, and other ways to understand their needs. If you want the answers to all these questions, you can use our 5x checklist.
