The Agile London System Alfonso Romero Holmes,Oscar de Prado,2016-10-15 It is not difficult to understand why The London System is such a popular chess opening with club players all over the world Against virtually every Black defence after 1 d4 it offers White an easy to learn and reliable set of lines with interesting choices between strategic or more aggressive approaches while avoiding tons of opening theory Lately an increasing number of Grandmasters such as Alexander Grischuk Gata Kamsky Baadur Jobava Richard Rapport and even World Champion Magnus Carlsen have played The London System In this light it is surprising that so little has been published about this fascinating universal weapon GM Alfonso Romero and FM Oscar de Prado have now filled this gap In The Agile London System they present both historical material and recent top level examples to provide a comprehensive overview The authors explain the typical plans and tactics using illustrative games with clear verbal explanations and provide lots of tactical and strategic exercises They reveal the secrets behind sharp ideas such as the Barry Attack and the Jobava Attack and have added an exciting chapter on the especially aggressive Pereyra Attack developed by the Argentinean master Manuel Pereyra Puebla

Slav Defence Playbook is a simple, safe, super-solid solution to your chess opening repertoire for Black after 1 d4 d5 2 c4 c6. This defence is a reliable response to all Closed Games. The Slav Defence makes your opening preparation easy. You do not need to memorize thousands of variations. You don't need to play risky gambits. The Slav is a repeatable, sound choice that allows you to quickly develop all your minor pieces and castle. It saves you time and energy. One of the best things about the Slav Defence as Black is that White has difficulty obtaining a lasting advantage. The book begins with a few Anti-Slav lines that could transpose to the Slav. The solid nature of the position gives Black an easier move selection which saves time. But White faces multiple subtle options which can be complex to analyze. Black's options are simple and sound. The Slav Defence fits with the Caro-Kann as Black and London 2 Bf4 as White. The author played all three of these defenses for years on the Internet Chess Club using SuperSolid as his handle. This Playbook is a tool to help you easily prepare to play your opening. The 200 diagrams in this playbook cover the variations that you are most likely to face. It is Black's move in every diagram. The author gives a reasonable move for Black in each position with a brief comment as to why it is recommended.
