Unfortunately there are many gaps in knowledge to understand the unique challenges this population faces. There are many opportunities to improve our understanding of these challenges that military personnel and Veterans face. The goal of this Research Topic is to shine a light and improve understanding of these challenges. We aim to collect knowledge from the global network of researchers working on topics related to Neurological and Neuropsychiatric disorders affecting military personnel and Veterans. Traffic and Transport Psychology Talib Rothengatter, Raphael Denis Huguenin, 2004-09-08. This volume gives an overview of the trends in Traffic and Transport Psychology. It reflects the considerable development of the most important factors for driving a road vehicle and the variety of international research approaches. The first part contains basic approaches and integrated models as well as general theories and their implementation into Traffic and Transport Psychology. The second part deals with the driver, especially cognition, performance, social, and differential effects, and impairment. Important aspects are treated such as speed perception, reaction times, interaction, risk acceptance, aggression, and gender differences. Special chapters refer to performance and fatigue. The third part focuses on safety, driver support, selection, and influencing drivers by enforcement, training, and programs for the rehabilitation of traffic offenders. Classic ergonomic methods are discussed as well as modern telematic devices or trends regarding driver assessment. In the last part, current developments are presented in relation to better mobility and the protection of the environment. Questions are asked such as whether we could reduce the use of cars, how travel behaviour can be modified, or to what extent the use of alternatives to motor vehicles benefits safety as well as the environment. This work is not only important for psychologists; it should be read by all transport professionals interested in the application of psychology to traffic.
