Brooke-Hunt** Susan lady Ardagh,1904 *The Golden Cord* Charles Taliaferro,2012-12-15 The title of Charles Taliaferro s book is derived from poems and stories in which a person in peril or on a quest must follow a cord or string in order to find the way to happiness safety or home In one of the most famous of such tales the ancient Greek hero Theseus follows the string given him by Ariadne to mark his way in and out of the Minotaur s labyrinth William Blake s poem Jerusalem uses the metaphor of a golden string which if followed will lead one to heaven itself Taliaferro extends Blake s metaphor to illustrate the ways we can link what we see feel and do with deep spiritual realities Taliaferro offers a foundational case for the recognition of the experience of the eternal God of Christianity in which God is understood as the fount of all goodness and the subject and object of our best love revealed through scripture tradition philosophical reflection and encountered in everyday events He addresses philosophical obstacles to the recognition of such experiences especially objections from the new atheists and explores the values involved in thinking and experiencing God as eternal These include the belief that the eternal goodness of God subordinates temporal goods such as the pursuit of fame and earthly glory that God is the essence of life and that the eternal God hallows domestic goods blessing the everyday goods of ordinary life An exploration of the moral and spiritual riches of the Christian tradition as an alternative to materialism and naturalism The Golden Cord brings an originality and depth to the debate in accessible and engaging prose

Lapidus,Michel Laurent Lapidus,Machiel van Frankenhuysen,2000 A fractal drum is a bounded open subset of \mathbb{R}^m with a fractal boundary A difficult problem is to describe the relationship between the shape geometry of the drum and its sound its spectrum In this book we restrict ourselves to the one dimensional case of fractal strings and their higher dimensional analogues fractal sprays We develop a theory of complex dimensions of a fractal string and we study how these complex dimensions relate the geometry with the spectrum of the fractal string We refer the reader to Berrl 2 Lapl 4 LapPol 3 LapMal 2 HeLapl 2 and the references therein for further physical and mathematical motivations of this work Also see in particular Sections 7 1 10 3 and 10 4 along with Appendix B In Chapter 1 we introduce the basic object of our research fractal strings see Lapl 3 LapPol 3 LapMal 2

HeLapl 2 A standard fractal string is a bounded open subset of the real line Such a set is a disjoint union of open intervals the lengths of which form a sequence which we assume to be infinite Important information about the geometry of c is contained in its geometric zeta function $\zeta_c(s) = \sum_{j=1}^{\infty} l_j^{s-1}$ 2 Introduction We assume throughout that this function has a suitable meromorphic extension The central notion of this book the complex dimensions of a fractal string c is defined as the poles of the meromorphic extension of ζ_c The Golden String Geoffry Smalley, 2025-05-09 A girl watches as her mom packs for yet another work trip Every time it gets harder This time a special gift from Mama helps remind her that no matter how far apart they are they are always connected The Golden String is a book for every kid who has a loved one who is away Rich emotional imagery immerses the reader with a young kid who is developing coping skills that can help get them through even the most frustrating day No matter the distance our love is our own special golden string keeping us connected The Golden Fleece A.
