

GROUP DYNAMICS

DEFINITION

Group dynamics refers to the patterns of behavior and interpersonal relationships within a group. It encompasses how group members interact, communicate, make decisions, and assume specific roles, ultimately shaping the group's overall performance and effectiveness.

EXAMPLES

- **Positive interdependence:** A good group has a sense of positive interdependence. This is a term used to describe a group dynamic wherein individual and group goals are aligned.
- **Shared purpose:** One of the first things a group lays out when it comes together is its purpose.

The Dynamics Of Group Behavior:

Group Dynamics Marvin E. Shaw,1981 Abstract The text is written for readers with a command of basic principles of social psychology but have relatively little background in the study of group behavior The author suggests that groups are formed for a broad variety of purposes and that our effectiveness in working with groups can be increased by understanding some of the many variables that affect group processes The author introduces findings from a number of empirical studies to make inferences about group behavior After introducing the reader to the study of small groups the author addresses several key topical areas in a chapter by chapter approach 1 individuals and groups 2 group formation and development 3 physical environment of groups 4 personal characteristics of group members 5 group composition 6 group structure 7 leadership 8 group tasks and group goals 9 groups in action and 10 issues and problems

A new look at process and outcome Sergio Salvatore,Wolfgang Tschacher,Omar Carlo Giacchino Gelo,Sabine C Koch,2016-04-11 In an attempt to cease from reducing the world and its emergent phenomena to linear modeling and analytic dissection Dynamic Systems Theories DST and Embodiment theories and methods aim at accounting for the complex dynamic and non linear phenomena that we constantly deal with in psychology For instance DST and Embodiment can enrich psychology s understanding of the communicative process both in clinical and non clinical settings In psychotherapy an important amount of research has shown that next to other ingredients the therapeutic relationship is the most important active factor contributing to psychotherapy outcome These findings give communication a central role in the psychotherapy process In the traditional view the underlying model of understanding psychotherapy processes is that of a number of components summatively coming together enabling us to make a linear causal prediction Yet communication is inherently

dynamic A shift to viewing the communication process in psychotherapy as a field dynamic phenomenon helps us to take into account nonlinear phenomena such as feedback processes within and between persons We thus propose an embodied enactive dynamic systems view as a new theoretical and methodological perspective that can more realistically capture what happens among and between two persons in psychotherapy This view reaches beyond the current narrow model of psychotherapy research DST and Embodied Enactive Approaches can offer solutions to the loss of non linear phenomena the complex dynamics of reality and the holistic level of analysis DST and Embodied Enactive Approaches have developed not in a single discipline but in a joined movement based on various fields such as physics biology robotics anthropology philosophy linguistics neuroscience and psychology and have only recently entered clinical theorizing The two new paradigms have already triggered a rethinking of the therapeutic exchange by recognizing the embodied nature of psychological and communicative phenomena Their integration opens up a promising scenario in the field of psychotherapy research developing new profoundly transdisciplinary theoretical concepts methodologies and standards of knowledge The notion of field dynamics enables us to account for the role of the communicational context in the regulation of intra psychological processes while at the same time avoiding the pitfalls of an ontologization of the hierarchy of systemic organization Moreover the new approach implements methodological strategies that can transcend the conventional opposition between idiographic and nomothetic sciences

Social Groups in Action and Interaction Charles Stangor,2004-08-02 The goal of Social Groups in Action and Interaction is to review and analyze the human group as it operates to create both social good and potentially social harm The book provides relatively equal emphasis on topics traditionally considered from an intra group perspective for instance conformity minority influence group decision making leadership and task performance as well as topics derived from an inter group perspective e g social categorization social identity intergroup conflict stereotyping prejudice and discrimination In addition topics that are not unique to either of these two approaches and yet which are important aspects of group relations such as culture crowd behavior social representations and negotiation are also covered

Social Groups in Action and Interaction Charles Stangor,2015-10-16 Social Groups in Action and Interaction reviews and analyzes the human group as it operates to create both social good and potentially social harm It summarizes current knowledge and contemporary research with real world examples in succinct yet engaging chapters to help students understand and predict group behavior Unlike other texts the book considers a wide range of topics such as conformity leadership task performance social identity prejudice and discrimination from both an intragroup and an intergroup perspective By looking at behavior both within and between groups it bridges the gap between these interconnected approaches The second edition is thoroughly updated to include new discussion of the biology and neuroscience of group formation recent developments in social identity theory and recent advances in the study of social networks It also includes questions for review and discussion in the classroom It provides the most comprehensive and essential resource for courses on group dynamics and behavior
