Davis,1972 **The Dynamics of Confucianism and Modernization in Korean History** T'ae-jin Yi,2007 This volume makes available for the first time in English a collection of the work of historian Yi Tae Jin Over the course of his career he has done path breaking research that covers virtually the entire Chos n period 1392 1910 from the Kory Chos n transition to the Kojong period and Korea s takeover by Japan in 1910 One of the focal points of his scholarship has been to reinterpret Neo Confucianism as a dynamic force in Korean history The first half of this volume is devoted to his seminal work on the historical factors behind the founding of the Chos n dynasty He has shown how the rise of Neo Confucianism during the Kory Chos n transition was tied to unprecedented advances in agriculture and medicine that led to a fundamental socio economic transformation of Korea A new social class emerged that became a leading force behind the new dynasty and adopted Neo Confucianism as its ideology One of the underlying concerns of his scholarship has been to overcome the legacy of Japanese colonial scholarship on Korean historiography His work refutes the notion of Korea as a Hermit Kingdom that was stagnant for centuries before its opening to the West The second half of the volume includes some of his work on modernization efforts in the late Chos n period as well as some of his more direct critiques of the continuing influence of Japanese historiography in Korea **Unfinished Agenda** Manning Nash,2019-03-18 Based on comprehensive anthropological field work and uniting ethnographic material with broader generalizations about the processes of modernization this book presents an analysis of social change since decolonization in Latin America the Middle East and particularly in Southeast Asia Professor Nash focuses on societies that are attempting to **University of California Union Catalog of Monographs Cataloged by the Nine Campuses from 1963 Through 1967: Authors & titles** University of California (System). Institute of Library Research,University of California, Berkeley,1972 The Two Majorities and the Puzzle of Modern American Politics Byron E. Shafer,2003 Where did the Era of Divided Government come

from What sustains split partisan control of the institutions of American national government year after year Why can it shift so easily from Democratic or Republican presidencies coupled with Republican or Democratic Congresses How can the vast array of issues and personalities that have surfaced in American politics over the last forty years fit so neatly within indeed reinforce the sustaining political pattern of our time These big questions constitute the puzzle of modern American politics The old answer a majority and a minority party plus dominant and recessive public issues will not work in the Era of Divided Government Byron Shafer a political scientist who is regarded as one of the most comprehensive and original thinkers on American politics provides a convincing new answer that has three major elements These elements in combination not divided government as a catch phrase are the real story of politics in our time The first element is comprised of two great sets of public preferences that manifest themselves at the ballot box as two majorities The old cluster of economic and welfare issues has not so much been displaced as simply joined by a second cluster of cultural and national concerns The second element can be seen in the behavior of political parties and party activists whose own preferences don't match those of the general public That public remains reliably left of the active Republican Party on economic and welfare issues and reliably right of the active Democratic Party on cultural and national concerns The third crucial element is found in an institutional arrangement the distinctively American matrix of governmental institutions which converts those first two elements into a framework for policymaking year in and year out In the first half of the book Shafer examines how dominant features of the Reagan first Bush Clinton and second Bush administrations reflect the interplay of these three elements Recent policy conflicts and institutional combatants in Shafer's analysis illuminate this new pattern of American politics In the second half he ranges across time and nations to put these modern elements and their composite pattern into a much larger historical and institutional framework In this light modern American politics appears not so much as new and different but as a distinctive recombination of familiar elements of a political style a political process and a political conflict that has been running for a much much longer time
