Biosorption Processes for Heavy Metal Removal Saini, Pinki, 2024-03-11 Persistent and non degradable

heavy metals stand as pollutants with the potential for severe ecological repercussions when released into the environment. Municipal and industrial wastewater face a high risk of contamination by these hazardous substances posing a formidable challenge to water treatment technologies. The imperative is clear: effective and affordable methods for effluent treatment and metal recovery are essential for meeting regulatory standards and unlocking the latent value of valuable metals within the waste. However, new methods of accomplishing this challenge are necessary for increasing the effectiveness in both cost and application. *Biosorption Processes for Heavy Metal Removal* comprehensively explores the imperative to remove heavy metals from waste streams. It provides an insightful overview of biosorbents and biosorption technology, focusing on their underlying biosorption features. The compilation within this book comprises a series of review articles delving into the current understanding of biosorption mechanisms and biochemistry, the efficacy of bacterial, fungal, and algal biomass, and practical considerations for biosorbent preparation and engineering. The physicochemical evaluations of biosorbents, process optimization, and factors influencing biosorption efficiency are also covered. Furthermore, the book explores biosorption applications for removing nutrients, organic pollutants, and metals in wastewater treatment across diverse contexts. Geared towards administrators, policymakers, consultants, industry professionals, academicians, scientists, researchers, and graduate and post-graduate students in environmental sciences and related fields, this book serves as their comprehensive reference.

Creating Literacy Instruction for All Students Thomas G. Gunning, 2005. With its inclusive view of literacy, *Creating Literacy Instruction for All Students* emphasizes methods that have been validated by research and practice while delivering the basics of all major aspects of reading and writing. The Fifth Edition of this best-selling book continues to be a comprehensive practical text that provides its readers with step-by-step guidance for teaching reading and writing. Written by distinguished author Tom Gunning, this text features sample lessons for virtually every major literacy skill, strategy, and offers numerous reinforcement suggestions and generous listings of materials. With its careful balance between the theory and the practice, readers are always given the theories behind the methods, encouraging them to choose, adapt, and construct their own approaches as they create a balanced program of literacy instruction. Special emphasis has been given to adapting instruction for English language learners, struggling readers and writers, and special needs students throughout the book. Unlike comparable texts, the new edition stresses effective steps for closing the gap between achieving and struggling readers as mandated by the No Child Left Behind legislation and Reading First.
