response is determined not by the play of an unknowable and arbitrary vital force but by laws that do not change and act equally and uniformly throughout both organic and inorganic matter This realization was always at the core of his work He sought to show that all materials react to their environments according to the same laws in other words everything exists in the same field of consciousness Om Namah Shivaya This book was originally published in 1902 Contents Introduction by Paramahansa Yogananda from Autobiography of a Yogi 1 The mechanical response of living substances 2 Electric response 3 Electric response in plants method of negative variation 4 Electric response in plants block method 5 Plant response on the effects of single stimulus and of superposed stimuli 6 Plant response on diphasic variation 7 Plant response on the relation between stimulus and response 8 Plant response on the influence of temperature 9 Plant response effect of anaesthetics and poisons 10 Response in metals 11 Inorganic response modified apparatus to exhibit response in metals 12 Inorganic response method of ensuring consistent results 13 Inorganic response molecular mobility its influence on response 14 Inorganic response fatigue staircase and modified response 15 Inorganic response relation between stimulus and response 16 Inorganic response effect of chemical reagents 17 On the stimulus of light and retinal currents 18 Inorganic response influence of various conditions on the response to stimulus of light 19 Visual analogues Effect of light of short duration 20 Conclusion
