Amy Kind, Daniel Stoljar, 2023-06-30 What is consciousness and why is it so philosophically and scientifically puzzling For many years philosophers approached this question assuming a standard physicalist framework on which consciousness can be explained by contemporary physics biology neuroscience and cognitive science This book is a debate between two philosophers who are united in their rejection of this kind of standard physicalism but who differ sharply in what lesson to draw from this Amy Kind defends dualism 2.0 a thoroughly modern version of dualism the theory that there are two fundamentally different kinds of things in the world those that are physical and those that are mental decoupled from any religious or non scientific connotations Daniel Stoljar defends non standard physicalism a kind of physicalism different from both the standard version and dualism 2.0 The book presents a cutting edge assessment of the philosophy of consciousness and provides a glimpse at what the future study of this area might bring Key Features Outlines the different things people mean by consciousness and provides an account of what consciousness is Reviews the key arguments for thinking that consciousness is incompatible with physicalism Explores and provides a defense of contrasting responses to those arguments with a special focus on responses that reject the standard physicalist framework Provides an account of the
