classroom technology and you'll find strategies and advice for maximizing success in each situation. Learn how best to leverage technology in traditional brick and mortar and remote classrooms with case studies of the hybrid school model. Gain tips and techniques to ensure that your teachers, students, and parents have the skills to succeed with technology. Discover strategies for setting norms and expectations and transitioning between online and traditional learning. Put into place proven methods for accountability and assessment of classroom successes. Gain resources to the most effective educational technologies available today in multiple subject areas including English, language arts, science, math, social studies, visual arts, dance, drama, music, and general education. View sample lesson plans for how to implement tools into your classroom, build culture and community, and adapt for different learners. Given the current push to remote teaching during the pandemic and the uncertainty over what the return to school and the traditional brick and mortar classroom will look like, *The Hybrid Teacher* will be an invaluable resource on the shelves of teachers and administrators alike.

Teaching and Learning at a Distance Michael Simonson, Susan M. Zvacek, Sharon Smaldino, 2019-07-01

Teaching and Learning at a Distance is written for introductory distance education courses for preservice or in-service teachers and for training programs that discuss teaching distant learners or managing distance education systems. This text provides readers with the basic information needed to be knowledgeable distance educators and leaders of distance education programs. The teacher or trainer who uses this book will be able to distinguish between appropriate uses of distance education. In this text, we take the following themes:

The first theme is the definition of distance education. Before we started writing the first edition of *Teaching and Learning at a Distance*, we carefully reviewed the literature to determine the definition that would be at the foundation of our writing. This definition is based on the work of Desmond Keegan but is unique to this book. This definition of distance education has been adopted by the Association for Educational Communications and Technology and by the *Encyclopedia Britannica*. The second theme of the book was the importance of research to the development of the contents of the book. The best practices presented in *Teaching and Learning at a Distance* are validated by scientific evidence. Certainly, there are rules of thumb, but we have always attempted to only include recommendations that can be supported by research. The third theme of *Teaching and Learning at a Distance* is derived from Richard Clark's famous quote published in the *Review of Educational Research* that states that media are mere vehicles that do not directly influence achievement. Clark's controversial work is discussed in the book but is also fundamental to the book's advocacy for distance education. In other words, we authors did not make the claim that education delivered at a distance was inherently better than other ways people learn. Distance delivered instruction is not a magical approach that makes learners achieve more. The fourth theme of the book is equivalency theory. Here, we presented the concept that instruction should be provided to learners that is equivalent rather than identical to what might be delivered in a traditional environment. Equivalency theory helps the instructional designer approach the development of instruction for each learner without attempting to duplicate what happens in a face-to-face classroom. The

final theme for Teaching and Learning at a Distance is the idea that the book should be comprehensive that it should cover as much of the various ways instruction is made available to distant learners as is possible It should be a single source of information about the field
