

TEACHING STRATEGIES

Teaching strategies are the strategies, methods, techniques, and plans that teachers put in place to assist student learning. Two selected examples are shown below.

DISCOVERY LEARNING

Discovery learning involves allowing students maximum freedom within a resource-rich environment to 'discover' answers to challenges. It requires students to build upon prior knowledge and use resources available in the environment to increase their own knowledge. Students are not 'told' information; instead, they must discover knowledge for themselves.

GUIDED PRACTICE

The I Do, We Do, You Do method is a guided practice strategy that provides gradual release of responsibility from the teacher to the student. It involves three steps:

- **I Do:** Teacher models the task
- **We Do:** Student and teacher do the task together
- **You Do:** Student attempts to complete the task alone.

Teaching Strategies For Mastery:

Teaching Strategies for Mastery Diane Stegall, 2004-08 Teaching Strategies for Mastery is an excellent book that will benefit both the student and the teacher. It contains various strategies that will enhance students' reading and math skills greatly. The strategies are designed to make the students process information. There is a lot of terminology used to help associate the skills or objectives being taught. The terminology is highlighted at the beginning of the book so that it can be used as a reference. This is very crucial and extremely helpful as students move up from one grade to another or new teachers come into the system. As the terminology and strategies are implemented within a classroom, the students will apply what they are doing in one subject area to all other areas. This is an outstanding process for correlating your curriculum throughout the school or district. New teachers also benefit from this greatly since everything is in the book and can be referred to. The book has guided practice and independent practice sheets for each strategy being taught in math and reading. Posters are also available to order. They will provide you with visuals you can display in your classroom to help teach the strategies that all your students must have.
