The Internet:

The Internet Imaginaire Patrice Flichy, 2007 The collective vision that shaped the emergence of the Internet what led software designers managers employees politicians and individuals to develop and adopt one particular technology In The Internet Imaginaire sociologist Patrice Flichy examines the collective vision that shaped the emergence of the Internet the social imagination that envisioned a technological utopia in the birth of a new technology By examining in detail the discourses surrounding the development of the Internet in the United States in the 1990s and considering them an integral part of that development Flichy shows how an entire society began a new technological era The metaphorical information superhighway became a technical utopia that informed a technological program The Internet imaginaire Flichy argues led software designers businesses politicians and individuals to adopt this one technology instead of another Flichy draws on writings by experts paying particular attention to the gurus of Wired magazine but also citing articles in Time Newsweek and Business Week from 1991 to 1995 He describes two main domains of the technical imaginaire the utopias and ideologies associated with the development of technical devices and the depictions of an imaginary digital society He analyzes the founding myths of cyberculture the representations of technical systems expressing the dreams and experiments of designers and promoters that developed around information highways the Internet Bulletin Board systems and virtual reality And he offers a treatise on the virtual society imaginaire discussing visionaries from Teilhard de Chardin to William Gibson the body and the virtual cyberdemocracy and the end of politics and the new economy of the immaterial

Using the Internet in Healthcare Stuart Tyrrell, 2002 Explaining each aspect of the Internet in a straightforward way this text gives practical advice on how the Internet can aid doctors nurses and managers in their daily work With information for every level of understanding this second edition reflects changes in the fast moving field

The Internet Playground Ellen Seiter, 2005 Based on four years of experience teaching computers to 8 12 year olds media scholar Ellen Seiter offers parents and educators practical advice on what children need to know about the Internet and when they need to know it The Internet Playground argues that contrary to the promises of technology boosters teaching with computers is very difficult Seiter points out that the Internet today resembles a mall more than it does a library While children love to play online games join fan communities and use online chat and instant messaging the Internet is also an appallingly aggressive marketer to children and as this book passionately argues an educational boondoggle

Coordinating the Internet Brian Kahin, James Keller, 1997 As it grows in scope bandwidth and functionality the Internet will require greater coordination but it is not yet clear what kind of coordinating mechanisms will evolve The essays in this volume clarify this issue and suggest possible models for governing the Internet

What's the Matter with the Internet? Mark Poster, 2001 In What's the Matter with the Internet leading cultural theorist Mark Poster offers a

sophisticated and astute assessment of the potential the new medium has to redefine culture and politics Avoiding the mindless hype and meaningless jargon that has characterized much of the debate about the future of the Web he details what truly distinguishes the Internet from other media and the implications these novel properties have for such vital issues as authorship national identity and global citizenship the fate of ethnicity and race and democracy Arguing that the Internet demands a social and cultural theory appropriate to the specific qualities of cyberspace Poster reformulates the ideas of thinkers associated with our understanding of post modern culture and the media including Foucault Deleuze Heidegger Baudrillard and Derrida to account for and illuminate the virtual world paying particular attention to its political dimensions and the nature of identity In this innovative analysis Poster acknowledges that although the colonization of the Internet by corporations and governments does threaten to retard its capacity to bring about genuine change the new medium is still capable of transforming both contemporary social practices and the way we see the world and ourselves

The Internet Jason Whittaker,2002 The Internet The Basicsprovides a concise and clearly written introduction to the study of the internet Covering its practical application as a tool for research as well as issues for communicating and designing for the web this book also questions the ways in which the internet has changed our cultures societies and identities The areas covered in this book include the history and development of the internet how it works how to use it for research and communication advice on good design practice for the web how regulation is changing to deal with the new media as well as questions of ethics how the internet is changing our social political psychological and economic relations with others The Internet The Basicsis a non technical comprehensive guide to the internet covering all aspects of the medium and its cultural and practical effects that will be of interest to anyone thinking of studying the subject

The Heart of the Internet Jacques Vallee,2003 Jacques Vallee was among the engineers and visionaries who set up the Internet hoping to connect people not control them through information For a few years it seemed that this dream was being realized But after the dot com crash of 2001 much of the Web s information flowed into the media giants and corporate conglomerates leaving millions of Net denizens without true freedom of choice And then there is the threat of government snooping All is not lost but it is time for public and private actions to rebuild the dream and win back our freedom In The Heart of the Internet Vallee reconstructs the history of computer technology and destroys a few myths Eniac was not the first computer Apple did not invent the mouse and neither did Xerox uses first person recollections and notes to describe the series of breakthroughs that transformed computers from calculating machines to universal platforms for new media describes the Internet in today s marketplace pressured on the one hand by commercial interests seeking to influence not merely our purchases but our thoughts and on the other by governmental obsession to harness the whole system to its own narrow definitions of security sacrificing our privacy and possibly our freedom in the process states a set of principles for network citizens and suggests how we can create new standards for Internet usage Book jacket
