The Inuksuk:

Inuksuk Book Mary Wallace,1999-01-01 Looks at traditional Inuit stone structures reveals their many functions in Inuit culture and shows readers how to construct their own inuksuk *A Place called Nunavut* Kim van Dam,2008-12-31 In 1999 Nunavut Territory was created in the Canadian Arctic The area is about 50 times as large as the Netherlands and is inhabited by a population of 30 000 85% of the population is Inuit the indigenous people in this area The central questions in this research project are what place or regional identities are being ascribed to Nunavut by different groups of people from within and from outside the region and how do these identities work In the process of the formation of the region the territorial Government of Nunavut is an important actor in producing a regional identity that is based on the cultural identity of the Inuit the Inuit Homeland This official regional identity creates a symbolic unity that is important in linking people to the region and through which the land the history and the people are united in a new territorial membership However there is no reason to assume that there is only one regional identity for Nunavut Different individuals or groups of people from within and from outside the region such as the people who live in one of the 25 communities and those who work for the multinational mining corporations or as tourist operators are also involved in the production and reproduction of identities for Nunavut They represent Nunavut for example as a place to live a resource region a wilderness or as a sustainable place Nunavut Government also links these alternative identities to the area because as a government they are not only interested in protecting Inuit culture but also aim to modernize the economy in order to enhance prosperity and well being As such the place identities are hybrid and identities that before were produced only by external actors are now also being produced by internal actors and vice versa The mediated Arctic Johannes Riquet,2024-09-24 The mediated Arctic analyses the multiple relations between geography and cultural production that have long shaped and are currently transforming the circumpolar world It explores how twenty first century cultural practitioners imagine and poeticise various elements of Arctic geography and in doing so negotiate pressing environmental geo political and social concerns From the plasmatic force of ice in Disney s Frozen films to the spatial vocabulary of circumpolar Indigenous hip hop it addresses Arctic geographical imaginaries in a wide range of media including literature cinema comic books music videos and cartographic art The book brings together a plurality of voices from within and outside the circumpolar North both in terms of the works analysed and in its own collaborative scholarly practice The book bridges Indigenous and Southern mediations of the Arctic and combines different epistemologies to do justice to these imaginaries in their diversity **Images of the North** Sverrir Jakobsson,2009 This interdisciplinary volume seeks to examine and explore the various issues surrounding image construction identity making and representations of the North as well as the interconnectedness between those issues The aim is to elucidate the multiple aspects of the idea of the North both as a mythological space and a discursive system created and shaped by cultures outside the North as well as from within The objective of the research project Iceland and Images of the North is to elucidate several

aspects of images of the North and to explore their functions in the present focusing especially on Iceland What effect have Iceland and its people had on images of the North and how do those images influence the Icelanders and other nations The project will be a cooperative interdisciplinary undertaking by researchers in the humanities and social sciences
