The Urban Political System:

The Urban Political System Eugene Lewis, 1973 Urban America Eugene Lewis, Frank Anechiarico, 1981 Urban Political Analysis David R. Morgan, Samuel A. Kirkpatrick, 1972 *Study On Globalizing Cities, A: Theoretical Frameworks And China's Modes* Zhenhua Zhou, 2014-01-24 A Study on Globalizing Cities is the latest masterpiece by Zhou Zhenhua a famous Chinese economist who closely tracks the theoretical study of global cities and is actively engaged in the strategic research of Shanghai's development With rich empirical data and an in depth analysis this book is of great theoretical and practical significance Different from studies on global cities by renowned western scholars this book extends its perspective to globalizing cities It explores a unique development model for China's globalizing cities by adopting a creative angle of observation and analytical methods By criticizing that the traditional global city theory derives the logic relations of global cities directly from globalization Mr Zhou puts forward the concept of globalization city which is introduced as a new intermediate explanatory variable More importantly this book emphasizes that the building of global cities is not only dependent on the distribution of urban space and urban economic development but also on comprehensive construction of multiple structures and functions of cities

Politics and the Urban Sector in Fifteenth-Century England, 1413-1471 Eliza Hartrich, 2019-08-14 Since the mid twentieth century political histories of late medieval England have focused almost exclusively on the relationship between the Crown and aristocratic landholders Such studies however neglect to consider that England after the Black Death was an urbanising society Towns not only were the residence of a rising proportion of the population but were also the stages on which power was asserted and the places where financial and military resources were concentrated Outside London however most English towns were small compared to those found in contemporary Italy or Flanders and it has been easy for historians to underestimate their ability to influence English politics Politics and the Urban Sector in Fifteenth Century England 1413 1471 offers a new approach for evaluating the role of urban society in late medieval English politics Rather than focusing on English towns individually it creates a model for assessing the political might that could be exerted by towns collectively as an urban sector Based on primary sources from twenty two towns ranging from the metropolis of London to the tiny Kentish town of Lydd Politics and the Urban Sector demonstrates how fluctuations in inter urban relationships affected the content pace and language of English politics during the tumultuous fifteenth century In particular the volume presents a new interpretation of the Wars of the Roses in which the relative strength of the urban sector determined the success of kings and their challengers and moulded the content of the political programmes they advocated

People and Politics in Urban America, Second Edition Robert W. Kweit, Mary G. Kweit, 2013-11-26 First Published in 1998 Approximately 75 percent of Americans live in cities and surrounding suburbs and the characteristics of those cities inescapably affect the quality of their lives This book examines the extent to which these Americans use the political process to control the characteristics of life in their metropolises In addition this second edition

revision places great emphasis on the role of political leaders while recognising the interdependence between those leaders and various interests in the city

Urban Governance Voice and Poverty in the Developing World Nick Devas, 2012 Poverty and governance are both issues high on the agenda of international agencies and governments in the South With urban areas accounting for a steadily growing share of the world's poor people an international team of researchers focused their attention on the hitherto little studied relationship between urban governance and urban poverty In their timely and in depth examination of ten cities in Africa Asia and Latin America they demonstrate that in many countries the global trends towards decentralization and democratization offer new opportunities for the poor to have an influence on the decisions that affect them They also show how that influence depends on the nature of those democratic arrangements and decision making processes at the local level as well as on the ability of the poor to organize The study involved interviews with key actors within and outside city governments discussions with poverty groups community organizations and non governmental organizations NGOs as well as analyses of data on poverty services and finance This book presents insights conclusions and practical examples that are of relevance for other cities It outlines policy implications for national and local governments NGOs and donor agencies and highlights ways in which poor people can use their voice to influence the various institutions of city governance

The Role of the State in China's Urban System Development Jiejing Wang, 2021-02-13 This book investigates how the state intervenes in the urban system in China in the post reform period To do so it constructs a conceptual framework based on the perspective of political hierarchy suggesting that the state power is hierarchically organized in China's urban system leading to variations in urban government capacities among cities The book reveals that the state has largely achieved the goal of its national urban system policy to strictly control the scale of large cities resulting in the under development of the large cities if they are mainly developing according to the market force However this has become less influential with the advances toward a market economy Further state regulation and policies have reduced the gaps between cities at the top and bottom of the urban hierarchy The book argues that the Urban Administrative System UAS is an important tool for the state to regulate urban system development and the administrative level has a significant effect on urban growth performance It contends that China's urban system is strongly shaped by the omnipresent state through the UAS which hierarchically differentiates between the urban growth processes By controlling the administrative level upgrading process the state can prevent the size and number of cities from increasing too rapidly This theoretical and empirical enquiry highlights the fact that the hierarchical power relations among cities and the resulting variations in urban government capacities are the key to understanding the role of the state in China's urban system development in the post reform period
